THIS THESIS HAS BEEN APPROVED
TO BE A PARTIAL FULFILLMENT OF THE REQUIREMENTS
FOR THE DEGREE OF MASTER OF SCIENCE
IN BIOINFORMATICS

EXAMINING COMMITTEE

..... CHAIRPERSON
Dr. Sissades Tongsim

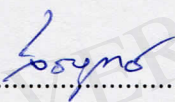

..... MEMBER
Assoc. Prof. Dr. Daoroon Kangwanpong

..... MEMBER
Assoc. Prof. Dr. Jeerayut Chaijaruwanich

..... MEMBER
Dr. Jatupol Kampuansai

THESIS ADVISORY COMMITTEE

..... ADVISOR
Assoc. Prof. Dr. Daoroon Kangwanpong

..... CO-ADVISOR
Assoc. Prof. Dr. Jeerayut Chaijaruwanich

..... CO-ADVISOR
Dr. Jatupol Kampuansai

ACKNOWLEDGMENTS

Many people have helped me throughout my degree. I feel proud of my decision to study Bioinformatics and do this research.

First and foremost I would like to express my sincere gratitude to my advisor, Assoc.Prof.Dr. Daoroon Kangwanpong, for the continuous support of my Master's degree study and research, and for her immense knowledge and important guidance. More than this, I really appreciate her great assistance in editing my work which is achieved successful presentation in the conferences, as well as this thesis is written completely.

I must also thank Assoc.Prof.Dr. Jeerayut Chaijaruwanich, the thesis co-adviser, who provides me knowledge in the field of data analysis and also proposing the concept of selecting the appropriate methods used to analyze data.

Furthermore I will never forget the encouragement of Dr. Jatupol Kampuansai, the co-adviser, who gives me advice, whether about knowledge of genetics and data analysis for my research to be accomplished successfully. Many of his valuable suggestions also help guiding my entire university's life since I have studied with him from the undergraduate level until today.

Besides my advisor and co-advisors, I am also very thankful to Dr. Sissades Tongsima for being my examining committee with many insightful clarifications.

I would like to extend gratitude to the HUGO Pan-Asian SNP consortium for useful SNP genotype data on 256 northern Thailand ethnic individuals.

This work was supported by Human Resource Development in Science Project (Science Achievement Scholarship of Thailand, SAST). I would like to thank for the finance education and funded research support.

I thanks for the place for my research, Bioinformatics Research Laboratory (BIRL), Faculty of Science, Chiang Mai University together with all members of the operating room who has helped thousands of good deeds.

I would like to special thank for all of members at the Population Genetic Laboratory in Department of Biology at Chiang Mai University for their helpful advice and companionship.

Lastly, I would like to thank my family for all unending compassion and encouragement. For my mother, her great supports push me forward to all my pursuits and embracing me to do things as I hurdle all the obstacles in the completion this research work. Another significant cheering is from my beloved daughter, who inspires me to fulfill the achievement in this Master's degree study. Thank you.

Massupa Kaewgahya
