	Page
Acknowledgement	iii
Thai abstract	iv
English abstract	vi
Table of contents	viii
List of tables	x
List of figures	xi
Chapter 1 Introduction	1
1.1 Background	1
1.2 Objective	6
1.3 Scope	6
1.4 Expected Benefits	6
Chapter 2 Principles, Theories and Literatures review	7
2.1 Vehicle Routing Problem (VRP)	7
2.1.1 Problem description	7
2.1.2 Mathematics model	8
2.2 Crossdocking System	9
2.3 Milk Runs	10
2.4 Genetic Algorithm (GA)	11
2.5 Value Stream Mapping (VSM)	16
2.5.1 Product-Quantity Analysis	16
2.5.2 Current State Mapping	16
2.5.3 Value stream analysisVSA	18
2.6 9 Logistics Activities	19
2.7 Economics Costs Benefit Analysis	19
2.7.1 Break-Even PointBEP	19
2.7.2 Internal Rate of ReturnIRR	22
2.7.3 Payback PeriodPB	24
2.8 Simple Additive Weighting (SAW)	25
2.9 Literatures Review	26
Chapter 3 Research Designs and Methods	32
3.1 Preliminary study of the case study and related literatures	32
3.2 Analyze current state TMS	34
3.3 Routing model without crossdock formulating	35
3.3.1 Mathematics model for VRP without crossdocking system	36

TABLE OF CONTENTS (Cont.)

	Page
3.4 Feasible crossdock location	38
3.5 Routing model with crossdock formulating	39
3.5.1 Mathematics model for VRP with crossdocking system	40
3.6 Economics cost-benefit analysis	41
Chapter 4 Results and Discussion	42
4.1 Case study	42
4.2 9 logistics activities	45
4.2.1 Material Management	46
4.2.2 Order Processing	47
4.2.3 Packaging	46
4.2.4 Transportation	47
4.2.5 Inventory	52
4.2.6 Warehouse	52
4.2.7 Material Handling	52
4.2.8 Customer Service	53
4.2.9 Other Logistics Activities	54
4.3 Routing model without crossdock formulating	54
4.4 Routing model with crossdock formulating	56
4.5 Economic costs benefit analysis	63
4.5.1 Example of daily transportation cost calculation.	63
4.5.2 Example of BEP calculation	64
4.5.3 Example of IRR calculation	64
4.5.4 Example of PB calculation	65
Chapter 5 Conclusion	66
References	69
Appendices	74
Appendix A Based Table	75
Appendix B Calculation Results Table	90
Appendix C VSM data Table	123
Curriculum Vitae	125

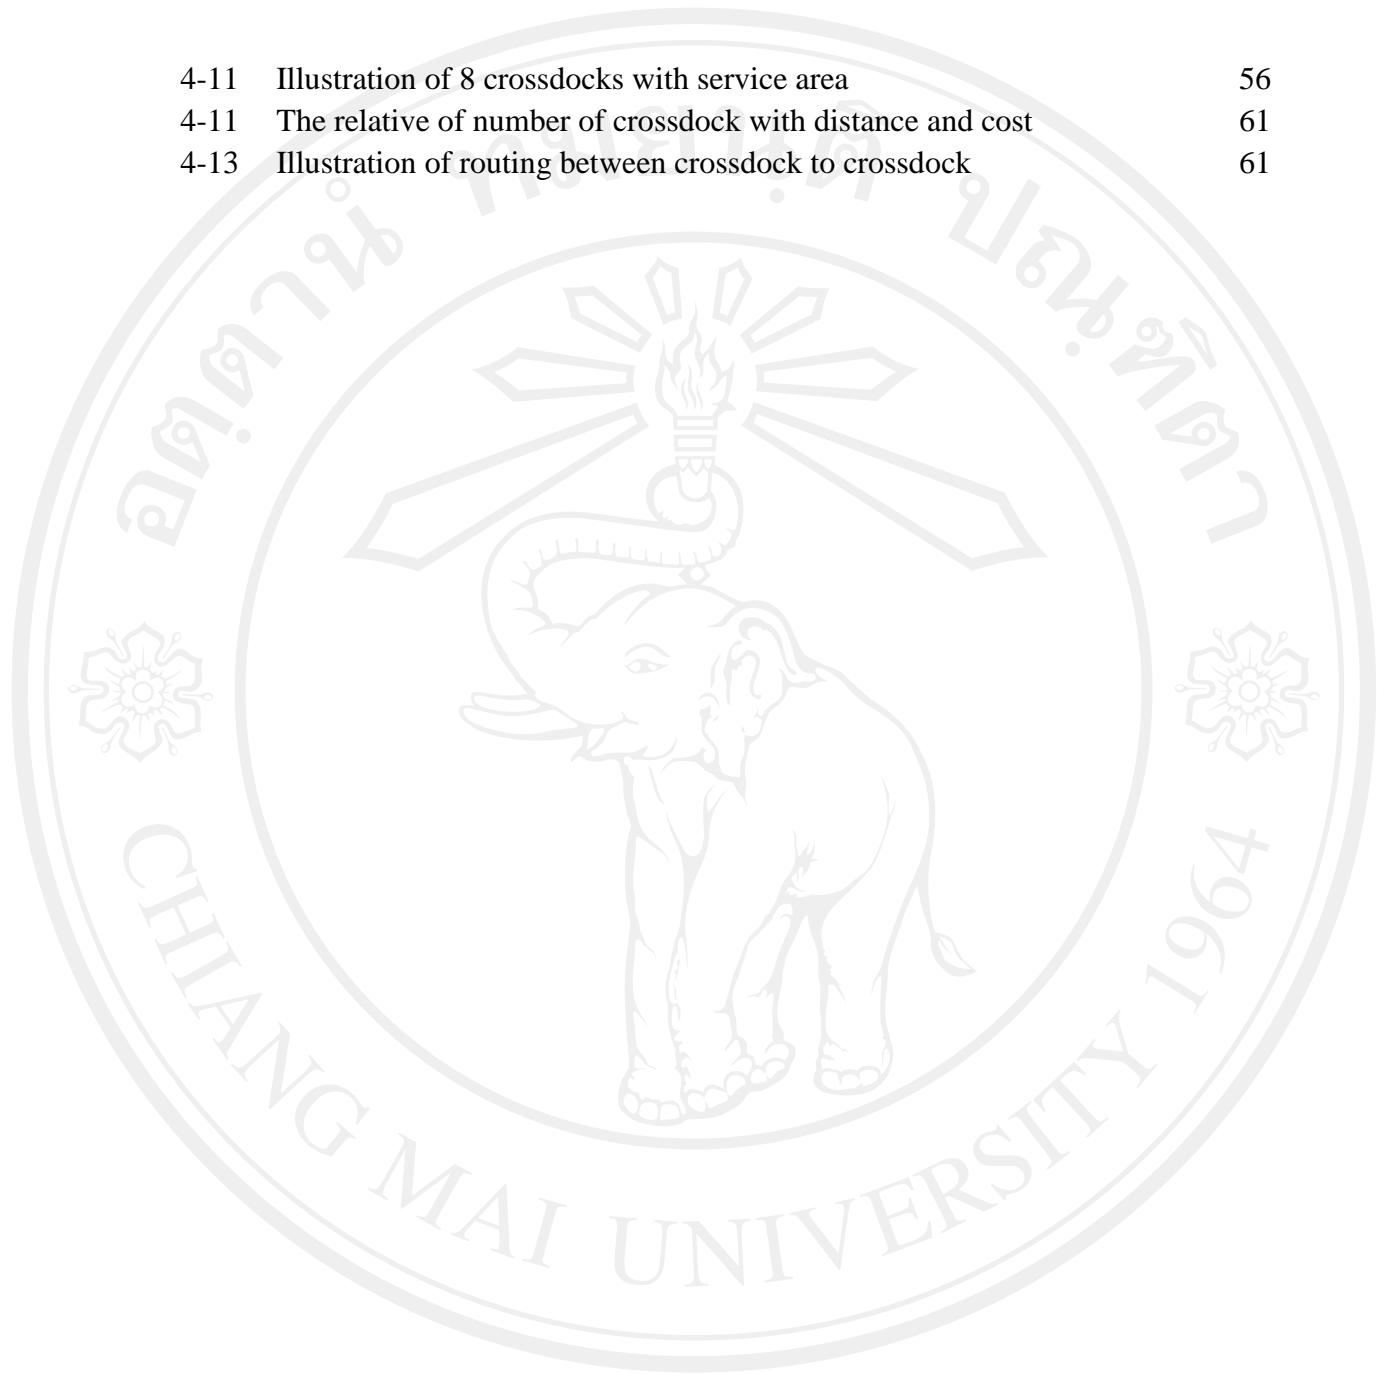

LIST OF TABLES

Table		Page
2-1	Vehicle routing problem category	8
2-2	Fitness value and Probability of example chromosome	15
2-3	New chromosome after selection	15
2-4	Table of IRR calculation example data set	23
3-1	Fleet details and vehicles properties	34
3-2	Experimental of GA parameters	35
3-3	Criteria for crossdock location selection	38
4-1	Current state conclusion data	44
4-2	Current transportation system information	46
4-3	Vehicle information	47
4-4	The sequence of current route	49
4-5	Conclusion of the results of the GA parameter experimental	54
4-6	The example of sequence of new route VRP without crossdock	55
4-7	Criteria weighting	55
4-8	The highest rank of 8 provinces	56
4-9	Conclusion of the results of 8 crossdocks VRP experimental	57
4-10	Routing of the best answer of 8 crossdocks VRP	57
4-11	VRP of CM PN crossdock to customers	58
4-12	Conclusion of the results of 7 crossdocks VRP experimental	59
4-13	Conclusion of the results of 6 crossdocks VRP experimental	59
4-14	Conclusion of the results of 5 crossdocks VRP experimental	59
4-15	Conclusion of the results of 4 crossdocks VRP experimental	60
4-16	Conclusion of the results of 3 crossdocks VRP experimental	60
4-17	Conclusion of total distance and cost of VRP with crossdocking system	60
4-18	Truck cost per type	62
4-19	Conclusion of solution	62
4-20	Cost-benefit analysis	64

LIST OF FIGURES

Figure		Page
1-1	High speed diesel price 2005-2012 with trend line	1
1-2	Logistics Cost of Thailand during 2002-2010 by Logistics Cost Type	2
1-3	Proportional of 3 types of Thailand Logistics Cost per GDP in 2002-2010	2
1-4	Proportional of Thailand domestic transportation mode 2011	3
1-5	Total distance of each mode by fuel 5 liters per ton	3
1-6	Pick-up truck	5
1-7	Medium truck	5
1-8	Large truck	5
2-1	Model of VRP network	8
2-2	Crossdocking System	10
2-3	Milk run illustration	11
2-4	Flow chart of Genetic Algorithm	12
2-5	Representation of a chromosome for a 3 vehicles, 9 customers example	13
2-6	Single point crossover operation	13
2-7	Swap mutation	14
2-8	Insertion mutation	14
2-9	Inversion mutation	14
2-10	The roulette wheel of probability	15
2-11	Starting of the value stream mapping	17
2-12	Map of the current state	18
2-13	Nine Logistics Activities	19
2-14	A Chart of Break-even Point Analysis	20
2-15	The Chart of IRR	22
2-16	TMS for backhaul management	27
3-1	Flow Chart of Research Methodology	32
3-2	Analysis current state TMS diagram	33
4-1	Current state VSM of Shredded pork roll	41
4-2	Current state cycle time	43
4-3	Overlapping bread 3 layers, rolling, cutting and arranging step respectively	44
4-4	Clam shell hand sealer	46
4-6	Automatic sealer machine	47
4-7	Illustration of current route in Chiang Mai	50
4-8	Multi-layer tray cart	51
4-9	Overlapable basket for finished goods	52
4-10	Illustration of example VRP without crossdock	54

4-11	Illustration of 8 crossdocks with service area	56
4-11	The relative of number of crossdock with distance and cost	61
4-13	Illustration of routing between crossdock to crossdock	61
