ACKNOWLEDGEMENT

When I was writing this thesis, I felt like I was writing a book. This is my first book, accordingly, it is impossible to even start or finish this book without supportive from people that impossible to give particular mention here in this tiny writing area.

I wish to express my greatest gratitude and thanks to my advisors, Assoc. Prof. Dr. Apichat Sopadang and Asst. Prof. Dr. Poon Thiengburanathum for their excellent guidance, invaluable advice, support and encouragement throughout the course of this study and preparation of this thesis. I also thanks to the member of my graduate committee for guidance and suggestions, Assoc. Prof. Dr. Komgrit Leksakul. Special thanks also go to Phung Noi Bakery Company owners for giving me a chance to observation, study and gathering data from production, delivery and other processes of their company. Moreover, thanks for their employees, especially K. Aoy; project manager that always support me and also cooperated to her co-worker.

I would like to acknowledge the academic, place and technical support of SCEM lab and department of logistics engineering and supply chain management, industrial engineering, faculty of engineering, Chiang Mai University. The good support and friendship from the SCEM lab members and logistics engineering and supply chain management students have been invaluable on both an academic and personal level, for which I am extremely grateful.

Last but not least, I would like to give a big thanks to my family, especially my parents for supporting and encouraging me to pursue this degree. Without them, I would not have finished the degree.

Prachya Khemacheewakul
