ACKNOWLEDGEMENTS

My deepest sincere to my thesis advisor, Dr. Pitchaya Mungkornasawakul, for her practical training, valuable suggestions and excellent encouragement throughout this work from the beginning until completion of the thesis. Without her encouragement, I would not have been able to complete this research.

I am also deeply grateful to Asst. Prof. Dr. Somporn Chantara my co-advisor and Assoc. Prof. Dr. Prasak Thavornytikarn for their kind advice, reviewing the manuscript and offering many useful suggestions until completion of this work.

I would like to thank Dr. Thunwadee Ritthiwigrom for her useful help in NMR analysis and kind assistance. Likewise, I wish to phrase my appreciation to Mr. Jame F. Maxwell at Department of Biology, Faculty of Science, Chiang Mai University for his identification of plant materials.

I would like to express gratitude to Dr. Sukanda Chaiyong for her kindness, help and valuable suggestion until completion of this thesis.

I also would like to thank the members of the Rice Laboratory, Department of Chemistry, Chiang Mai University. I would like to thank the members and the staffs in the Environmental Science Program, Faculty of Science, Chiang Mai University.

I like to emphasize my grateful to The Science Achievement Scholarship of Thailand (SAST) for financial support.

Finally, I am deeply grateful to my beloved family, father, mother, sister and all friends for their wonderful inspiration, generous understanding and loving support throughout my life.
