ACKNOWLEDGMENTS

I am grateful for the invaluable help and advice in this research of my thesis advisory committee, namely, Dr. Tippawan Prapamontol, Assoc. Prof. Ampica Mangklabruks, M.D., Assist. Prof. Dr. Somporn Chantara, Dr. Chaisuree Suphavitai and Prof. Dr. Bruce D. Hammock.

This study was funded by grants from The Royal Golden Jubilee Ph. D. program, The Thailand Research Fund (PHD/0184/2547) and the Thailand Research Fund (TRF, Contract DBG5080018). It was also supported by Commissions for Higher Education (CHE) through National Research University Program Chiang Mai University, Ministry of Education, Thailand.

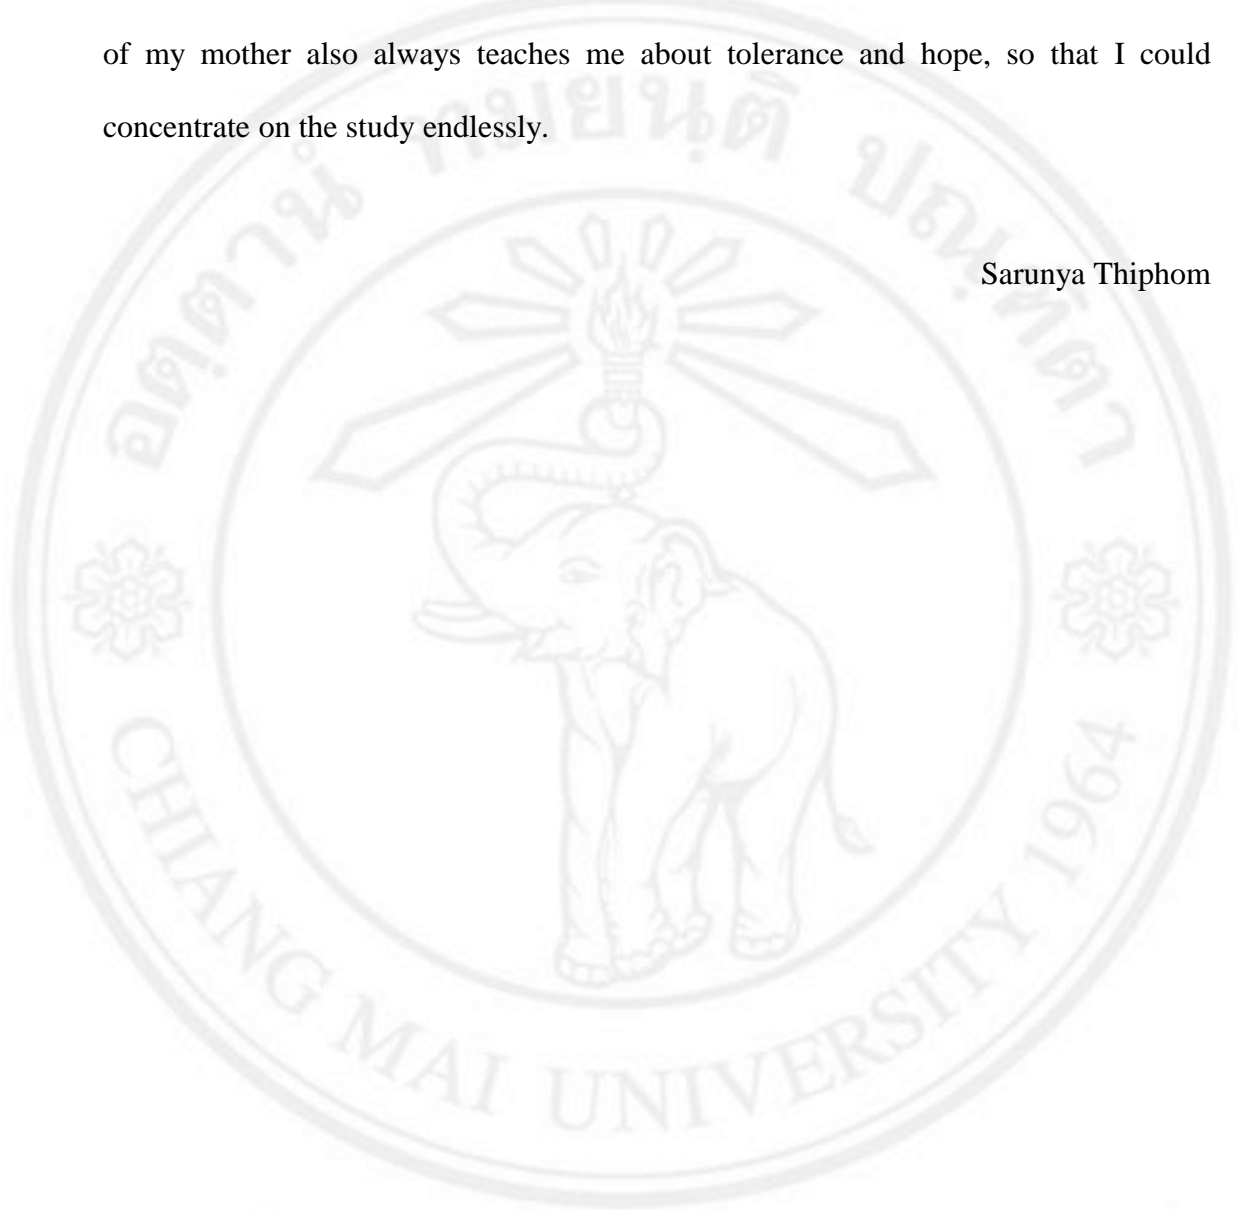

I would like to deeply thank the United States National Institute of Environmental Health Science P42ES04699 and the Center for Disease Control/National Institute of Occupational Health Science U50 OH07550 to give me experiences in USA laboratory and the financial support. Accordingly, I am also grateful for the guidance of Prof. Bruce D. Hammock, Mrs. Shirley J. Gee and Dr. Ki Chang Ahn when I stayed in USA.

I thank the Research Institute for Health Sciences (RIHES), Chiang Mai University, for laboratory and field study support.

I would like to express my gratitude to Ms. Tanyaporn Kerdnoi and Dr. Surat hongsihsong and all colleagues at Environment and Health Research Unit, RIHES for support during my study.

Finally, the fulfillment of this thesis is closely connected with the infinite love of my mother also always teaches me about tolerance and hope, so that I could concentrate on the study endlessly.
