ACKNOWLEDGEMENTS

In the first place I would like to record my gratitude to Asst. Prof. Dr. Siriwadee Chomdej for her supervision, advice, and guidance from the very early stage of this research as well as giving me a great opportunity to get into the Ph.D. program. Above all and the most needed, she provided me unflinching encouragement and support in various ways. Her truly teacher intuition has made her as a constant oasis of ideas and passions in science, which exceptionally inspire and enrich my growth as a student, a researcher and a scientist want to be. I am indebted to her more than she knows.

Besides my supervisor, I would like to thank the rest of my thesis committee: Assoc. Prof. Dr. Narit Sitasuwan, Asst. Prof. Dr. Chitchol Phalaraksh and Asst. Prof. Dr. Weerah Wongkham, for their encouragement, insightful comments, and hard questions.

I would like to thank Prof. Dr. Ya-ping Zhang and Prof. Dr. Jing Che at the State Key Laboratory of Genetic Resources and Evolution, Kunming Institute of Zoology, Chinese Academy of Sciences, China for their helpful in providing facilities in molecular work for my thesis experiment. In addition supporting the laboratory work, the opportunities Prof. Dr. Ya-ping Zhang and Prof. Dr. Jing Che provided to broaden my professional experience and prepare me for the future challenges are gratefully acknowledged.

I would like to extend special thanks to other significant man is Mr. Tanya Chan-ard for support with collecting specimens, Identification, and Thailand Natural History Museum for facilitating my fieldwork, thank you for your participation in good suggestion. Your input at various times has been crucial to the success of this work.

The good advice and support, helping with Morphology analysis and friendship of Dr. Somboon Kamtaeja, has been invaluable on both an academic and a personal level, for which I am extremely grateful.

I gratefully thank Dr. Kamolchai Kotcha and Asst. Prof. Dr. Aphinun Suvarnaraksha for their constructive comments on this thesis. I am thankful that in the midst of all their activity, they accepted to be members of the examining committee.

My special thanks go to Dr. Maslin Osathanunkul, without her this thesis would be unintelligible to read at all due to my “not good enough” English.

I would like to thank the National Research University Project under Thailand's Office of the Higher Education Commission and Chiang Mai Zoo for financial support and staff in the Molecular Genetics Lab, Department of Biology, Faculty of Science, Chiang Mai University, The Graduate School, Chiang Mai University of Thailand which supported this work.

Many individuals involved in helping and supporting the field work for this research. From Huai Hongkhrai Royal Development Study Center in Thailand: Mr. Sawing Khuntasa. From the State Key Laboratory of Genetic Resources and Evolution, Kunming Institute of Zoology, Chinese Academy of Sciences, China: Mr. Jiang Ke and Miss Yan Fang. From Department of Biology, Faculty of Science, Chiang Mai University, Chiang Mai, Thailand: Mr. Akalak Kunsorn. All staff at Mae

Hong Son Province all staff. I am very grateful to all these individuals for their support.

Finally, I would like to express my deep appreciation to my beloved family; my father and mother for their emotional support, understanding and constant encouragement to help me to carry out this Ph.D. degree and Thank you for your unconditional love, support and patience. Without you all, this would not have been possible.
