ACKNOWLEDGEMENT	III
ENGLISH ABSTRACT	IV
THAI ABSTRACT	VI
LIST OF TABLE	XIII
LIST OF FIGURE	XV
ABBREVIATIONS	XVI
CHAPTER 1 INTRODUCTION	1
1.1 Background	1
1.2 Rational	2
1.3 Literature review	3
1.3.1 Significance of forest tenure	3
1.3.2. The Changes of land tenure in China from 1949-present	4
1.3.3. Linear programming model and application in forest management	5
1.4 Research objective	6
1.5 Structure of the thesis	7
CHAPTER 2 FOREST POLICIES IN CHINA	8
2.1 Definition of forest tenure	8
2.2 Forest tenure system in China	9

TABLE OF CONTENTS (Continued)

	Page
2.3 Review of forest tenure change in China from 1949 to 2003	11
2.3.1 Land reform and initial community (1949 - 1955).	11
2.3.2 Superb mutual-aid team and Peoples' Commune (1955 - 1961)	12
2.3.3 Cultural Revolution (1961 - 1978)	14
2.3.4 Household Contract Responsibility System (1978 - 2003)	14
2.3.5 The Reform of Collective Forest Use right (RCFUR) (2003)	19
2.3.6 The trend of forest tenure	20
2.4 Implement of the Reform of Collective Forest Use Rights (2003) in the study area	21
CHAPTER 3 RESEARCH METHODOLOGY	23
3.1 General research concept	23
3.2 Data required and collection methods	24
3.2.1 Primary data	24
3.2.2 Secondary data collection	25
3.3 Data analysis methods	25
3.3.1 Economic analysis	26
3.3.2 Linear Programming	28
3.3.2.1 Objective function	28
3.3.2.2 The components of the objective function	29
3.3.2.3 Constraints	31

TABLE OF CONTENTS (Continued)

	Page
3.3.2.4 Scenarios	36
3.3.2.5 Model validation	40
3.3.2.6 Software implementation	40
3.4 Description of the study area	40
3.4.1 Natural conditions of the Study Area	40
3.4.2 Socioeconomics	42
CHAPTER 4 RESULTS	43
4.1 General information and resource availability	43
4.1.1 Family size and labor	44
4.1.2 Education level and knowledge about RCFUR	44
4.1.3 Land availability	45
4.1.4 Crop production, silk production and animal husbandry	46
4.1.5 Forest activities	48
4.2 Economic analysis of productive activities	50
4.2.1. Gross margin analysis	50
4.2.2 Net Present Value and Annual Equivalent Value of forest activities	52
4.2.3 Family income structure in average level	55
4.3 Impact analysis	55
4.3.1 Validation of linear programming model	55
4.3.2 The impact of the tested scenarios	58

TABLE OF CONTENTS (Continued)

	Page
4.3.2.1 Impact of the Reform of Collective Forest Use Right	58
4.3.2.2. Implement of Reform of Collective Forest Use Right with Sloping Land Conversion Program	65
4.3.2.3. Impact of Reform of Collective Forest Using Right and planting mulberry tree in forest land	68
4.3.2.4. Impact of Reform of Collective Forest Using Right with changing logging quotas	71
4.3.2.5: Impact of Reform Collective Forest Using Right with Forest certification mortgage credit.	73
 CHAPTER 5 STUDY LIMITATIONS, CONCLUSIONS AND RECOMMENDATIONS	 78
5.1 Study limitations	78
5.1.1 Study data quality	78
5.1.2. Model limitations	78
5.1.3. Recommendation for future research	79
5.2 Conclusions and recommendations	79
5.2.1 Conclusion of Chinese forest policies from 1949 till now	79
5.2.2. Conclusion of economic analysis	80
5.2.3 Conclusion from with Reform of Collective Forest Use Rights	80

TABLE OF CONTENTS (Continued)

	Page
5.2.4 Conclusion of implement of Reform of Collective Use Rights with Slopping Land Conversion Program	81
5.2.5 Conclusion of Reform of Collective Forest Using Right and planting mulberry trees in forest lands	82
5.2.6 Conclusion of Reform of Collective Forest Use Rights with changing logging quotas	82
5.2.7 Conclusion of impact of Reform of Collective Forest Use Rights with forest certification mortgage credit in each scenario	82
REFERENTS	84
APPENDIX	89
Annex 1: Questionnaire for Survey	90
CURRICULUM VITAE	102

LIST OF TABLE

Table	Page
1 Theoretical Calculation Frame of gross margin analysis	26
2 Theoretical Calculation Frame of NPV and AEV of Long-term Activities	28
3 Difference of Constraints and Variables in Different Scenarios	39
4 General Information for Farm Households from Samples	43
5 Gross Margin for Crop Productions, Silk Production and some Forest Activities in Heishui Village in 2010.	51
6 Gross Margin for Animal Husbandry in Heishui Village in 2010.	52
7 Cost and Labour Used per mu of New Forest Productions after the RCFUR	53
8 Comparison of Net Income of Main Productions between Baseline Scenario and the Surveys in Heshui Village	57
9 Results on Resource Used and a Combination of Farm Enterprise from the Baseline Scenario and Surveys in Heshui Village	57
10 Net Incomes Comparison between Baseline Scenario and Scenario 1a	59
11 Main Resource Used by Baseline and Scenario 1a	60
12 Activities Selected by Baseline and Scenario 1a	61
13 Shadow Prices of Several Constraints in Baseline	63
14 Shadow Prices of Main Resources in Scenario 1a	64
15 Shadow Prices of New Forest Productions in Scenario 1a	64
16 Net Incomes Comparison between Scenario 1a, and Scenario 2a.	65
17 Main Resource Used in Scenario 2a(4 mu) and Scenario 2a (3 mu)	66
18 Shadow Prices of Main Resources in Scenario 1a and Scenario 2a	67

LIST OF TABLE (Continued)

Table	Page
19 Net Incomes Comparison between Scenario 1a, and Scenario 3a	68
20 Activities Selected by Scenario 1a and Scenario 3a	69
21 Main Resource Used by Scenario 1a and Scenario 3a	70
22 Net Income between Scenario 1a and 4a	71
23 Activities Selected by Scenario 1a and Scenario 4a	72
24 Main Resource used in Scenario 1a and 4a	73
25 Comparison of Net Incomes of Household in Each Scenario with 0.07 interests	74
26 Activities Selected Between a Run and b Run in Each Scenario	75
27 Comparison of Total Net Family Income among of Difference Area of Arable Lands Transferred to Forest Lands	76
28 Comparison of Net Family Incomes in Each Scenario with 0.15 Interests	77

LIST OF FIGURE

Figure	Page
1 The Trend of Change of Forest Tenure in China from 1949 to 2003	21
2 General Concept of the Research	24
3 General Structure of the Baseline Farm-household-family Linear Programming Matrix for One Average Year	33
4 Map of Yunnan Province of P.R of China	41
5 Family Income Structures in Average Level in Heishui Village in 2010.	55
