ACKNOWLEDGMENTS	iii
ABSTRACT (in English)	iv
ABSTRACT (in Thai)	v
LIST OF TABLES	ix
LIST OF FIGURES	x
CHAPTER 1 INTRODUCTION	1
1.1 Statement of the problem	1
1.2 Wine	2
1.2.1. Wine making	2
1.2.2 Wine making process	3
1.2.3 Grapes	4
1.2.4 Harvesting and de-stemming	4
1.2.5 Crushing and primary fermentation	5
1.2.6 Pressing	7
1.2.7 Pigeage	8
1.2.8 Cold and heat stabilization	9
1.2.9 Secondary fermentation and bulk aging	9
1.2.10 Malolactic fermentation	10
1.2.11 Laboratory tests	10
1.2.12 Blending and fining	11
1.2.13 Preservatives	12
1.2.14 Filtration	13
1.2.15 Bottling	13
1.2.16 Wine aging	13
1.2.17 Artificial aging	17
1.2.18 Oak Aging	17

1.2.19 Barrel alternatives 20
1.2.20 Oak Composition in Wine Aging 21
1.2.21 Other wood types 26
1.3 Aroma of wine 27
1.3.1 Components of a wine's aroma 27
1.3.2 Aroma compounds identification 28
1.3.3 Wine tasting 29
1.4 Wood types which used in this research 30
1.4.1 Longan 30
1.4.2 Luna nut 32
1.4.3 Drumstick 32
1.4.4 Black poum 34
1.4.5 Neem 35
1.4.6 Oak 37
1.5 Literature Review 39

CHAPTER 2 MATERIALS AND METHODS 43
2.1 Chemicals and Materials 43
2.1.1 Chemical 43
2.1.2 Material 43
2.2 Instrument 43
2.3 Methods 44
2.3.1 Wine Aging 44
2.3.2 Examiners training 44
2.3.3 Wine sample preparation and sensory evaluation 44
2.3.4 Volatile compound analysis 45
2.3.5 Antioxidant activity analysis 46

CHAPTER 3 RESULTS 47
3.1 Wine aging process 47
3.2 Wine Sensory Tasting 48
3.3 Volatile compounds analysis 50
3.4 Antioxidant activity of wine sample 51

CHAPTER 4 DISCUSSION 59
4.1 Wine Sensory Tasting 59
4.2 Volatile compounds analysis 60
4.3 Antioxidant activity of wine samples 61

CHAPTER 5 CONCLUSION 63
5.1 Wine sensory tasting 63
5.2 Volatile compound analysis 63
5.3 Antioxidant activity of wine samples 63

REFERENCE 65

APPENDICES

APPENDIX A : SOLUTION AND CALCULATION ABOUT ANTIOXIDATION ACTIVITY 69

APPENDIX B : WINE TASTING TABLE FORM AND TASTING SCORE RESULT 71

APPENDIX C : TIC CROMATOGRAM 75

APPENDIX D : MASS SPECTRA OF INTERESTED VOLATILE COMPUONDS 82

APPENDIX E : TRAINING PROCEDURE 86

APPENDIX F : PICTURE RELATE IN THIS WORK 88

CURRICULUM VITAE 90

LIST OF TABLES

Table		Page
1.1	Major Constituents in Oak.	21
3.1	Average satisfactory score by 50 volunteers	48
3.2	One-way ANOVA analysis of wine samples evaluation score.	48
3.3	One-way variance analysis between each pair data group with t-test.	49
3.4	List of the interested volatile compounds found in wine samples.	51
3.5	Absorbance at 517 nm and percentage of absorbance decrease in antioxidant activity test of Longan wood aged wine.	52
3.6	Absorbance at 517 nm and percentage of absorbance decrease in antioxidant activity test of Luna nut wood aged wine.	53
3.7	Absorbance at 517 nm and percentage of absorbance decrease in antioxidant activity test of Drumstick wood aged wine.	54
3.8	Absorbance at 517 nm and percentage of absorbance decrease in antioxidant activity test of Neem wood aged wine.	55
3.9	Absorbance at 517 nm and percentage of absorbance decrease in antioxidant activity test of Black poum wood aged wine.	56
3.10	Absorbance at 517 nm and percentage of absorbance decrease in antioxidant activity test of Oak wood aged wine.	57
3.11	The results of IC_{50} of six kinds of wine samples	58

LIST OF FIGURES

Figure		Page
1.1	Structure of Cellulose	22
1.2	Structure of a) Furfural; b) Cyclotene; c) Ethoxylactone; d) Maltol; e) Hydroxymaltol; f) Dihydroaltol; g) Isomaltol	23
1.3	Structure of a) Vanillin; b) Syringaldehyde; c) Coniferaldehyde; d) Sinapaldehyde	24
1.4	Structure of a) Gallic acid; b) Ellagic acid.	25
1.5	Structure of Ellagitannins	26
3.1	Wood chips preparation, (1a) wood timber, (1b) sliced wood, (1c) roasted wood.	47
3.2	Wine samples (a) red fresh wine from Maechan Winery (b) red wind after aging with roasted wood chips.	47
3.3	TIC Chormatogram of Longan wood aged wine.	50
3.4	TIC Chormatogram of Luna nut wood aged wine	50
3.5	TIC Chormatogram of Drumstrick wood aged wine.	50
3.6	TIC Chormatogram of Neem wood aged wine	50
3.7	TIC Chormatogram of back poum wood aged wine	50
3.8	TIC Chormatogram of Black poum wood aged wine	50
3.9	The relationship plot of wine concentrations versus absorbance at 517 nm of Longan wood aged wine. The concentration at the decrease of absorbance value to 50% is 1.62% v/v.	52
3.10	The relationship plot of wine concentrations versus absorbance at 517 nm of Luna nut wood aged wine. The concentration at the decrease of absorbance value to 50% is 7.20% v/v.	53
3.11	The relationship plot of wine concentrations versus absorbance at 517 nm of Drumstick wood aged wine. The concentration at the decrease of absorbance value to 50% is 7.11% v/v.	54

3.12	The relationship plot of wine concentrations versus absorbance at 517 nm of Neem wood aged wine. The concentration at the decrease of absorbance value to 50% is 5.40%v/v.	55
3.13	The relationship plot of wine concentrations versus absorbance at 517 nm of Black poum wood aged wine. The concentration at the decrease of absorbance value to 50% is 6.76 %v/v.	56
3.14	The relationship plot of wine concentrations versus absorbance at 517 nm of Oak wood aged wine. The concentration at the decrease of absorbance value to 50% is 8.47 %v/v.	57
4.1	Structure of (a)eugenol , (b)β-caryophylleneand (e)α-humulene	60
