ACKNOWLEDGEMENTS

This thesis could not successfully complete without the support of many people, including my committee, my family, my friends, and colleagues.

First of all, I am profoundly grateful to my supervisor, Dr. Kanchana Dumri, for her excellent supervision, valuable guidance and constant encouragement throughout this study and through situations for whole time. Most importantly, I would like to thank you a lot of Dr. Dau Hung Anh and Asst. Prof. Dr. Sunanta Wangkan for Many comments and suggestions, I will try the best to do.

I wish to express my appreciation to the Royal Foundation Project, in the Pesticide Residue Analytical Laboratory, Chiang Mai, Thailand for supporting the chemical in this thesis.

Additionally, I am very pleasure for Postgraduate Education and Research Program in Chemistry (PERCH-CIC), Nation Research University (NRU), Chiang Mai University, for the financial support. And all of staff and colleagues in Chemistry and Biochemistry and Biochemical technology division, Department of chemistry, Faculty of Science, Chiang Mai University for their helpful in providing the facilities and places for my thesis.

Not forgotten, my grateful to all my friends for their help during the course for my study. Last, to my family, I am deeply gratitude to my father and mother for love, inspiration and understanding.

Suphara Tha-in
