ACKNOWLEDGEMENTS

Writing this thesis was like to a long journey. On this journey, I have received invaluable experiences in an academic field. Indeed, I would like to express my gratitudes to many people who support me, but it is impossible to name them all.

My chairperson of a thesis advisory committee, Assoc. Prof. Dr. Apichat Sopadang, stimulated me to be a member of the Ph.D. first generation in Industrial Engineering department, Chiang Mai University while I determined to study in Ph.D. program. He still serves as the best role model to me, both as an individual and as a researcher. Actually, he is also my former advisor who guided me at the bachelor's degree period.

Moreover, it is a great honor to have Assoc. Prof. Dr. Nivit Chareonchai and Assoc. Prof. Isra Teerawatsakul on the thesis advisory committee. I would also like to express my gratitudes to Assoc. Prof. Dr. Sermkiat Jomjunyong who is my chairperson for valuable comments. The success of this thesis would not be possible without precious comments and suggestions from Prof. Dr. Pakorn Adulbhan and Assoc. Prof. Dr. Sataporn Amornsawadwatana, external examine committee. Assoc. Prof. Dr. Wichai Chattinnawat is the man who keeps Ph.D. program of industrial engineering alive. He plays a significant role to activate all Ph.D. students. My Ph.D.

colleagues mean a lot to me for their supports, suggestions, pleasure and friendliness.

During this journey, I was glad to share my idea with many academicians in Japan and France. Assoc. Prof. Dr. Yasushi Honda and Prof. Dr. Jianming Shi from Muroran Institute of Technology, Japan who always had times whenever I contacted

them and have been of an enormous help. I also had a chance to work at Laboratoire Décision et Information Pour les Systèmes de Production, Université de Lyon, France. At this place, Prof. Dr. Abdelaziz Bouras has been a great boss. His creativeness, diligence, inexhaustible energy and humor are unparalleled.

The author would like to thank the Supply Chain and Engineering Management (SCEM) Research Unit, Industrial Engineering Department, Chiang Mai University. Financial support from the Thailand Research Fund through the Royal Golden Jubilee Ph.D. Program is cordially acknowledged.

My family has always been there for me with unconditional love. Finally, I turn my attention to Jib (Premjit Charoenweerakul, M.D.). She is a wonderful source for kindness, encouragement and inspiration. This journey would have not been completed without her.
