## ACKNOWLEDGEMENTS

The completion of this thesis would be impossible without contribution from many people whom I would like to thank. First, I would like to give my sincere thanks and appreciate to my advisor, Asst. Prof. Dr. Somporn Chantara, for her kind supervision, invaluable guidance, provided knowledge, comment thesis writing and constant inspiration throughout this study. My co-advisor, Dr. Tippawan Prapamontol, Dr. Urai Tengjaroenkul and Asst. Prof. Dr. Sukon Prasitwattanaseree, I am grateful for their guidance for experiment, checked and corrected the fault of this thesis and practical solutions concerning the experiments involved.

Thanks to Mrs. Ing-on Chaisri and Mrs. Dujduan Sangboon for their helps and guidance in the lab work. I also thank Mr. Wan Wiriya for his guidance and training of using ion chromatograph.

I gratefully acknowledge Center of Excellence on Environmental Health and Toxicology (EHT) for the financial support and the Environmental Chemistry Research Laboratory (ECRL), Chemistry Department, Faculty of Science, Chiang Mai University for the provision of research facilities. My thanks also go to all my friends in the ECRL for their needed help and useful suggestions.

Finally, I would like to give special thanks to my parents who have always loved me and have given me endless support and inspiration.
