ACKNOWLEDGEMENTS

The author would like to gratefully thank my supervisors, Assistant Professor Dr. Phisit Limtrakun, Associate Professor Dr. Apichet Boonsoong and Associate Professor Dr. Yuenyong Panjasawatwong for his supervision, encouragement and criticism during the preparation of this thesis. Special thanks also go to Professor Dr. Yuejun Wang, Dr. Xiaoping Xia and Mr. Ta Xianglin, State Key Laboratory of Isotope Geochemistry, Guangzhou Institute of Geochemistry, Chinese Academy of Sciences, Guangzhou, China for REE analyses, and Dr. Sebastien Meffre of LA-ICPMS Zircon Geochronology Laboratory, University of Tasmania, Australia, for zircon dating. Thanks are also extended to many people who assisted during this study, in particular Assistant Professor Dr. Burapha Phajuy, Dr. Weerapan Srichan and Dr. Boontarika Srithai for their advice and encouragement; Mr. Chantip Panthusa (Department of Geological Sciences, Faculty of Science, Chiang Mai University) for making thin sections; and all members of Department of Geological Sciences, Chiang Mai University, who have not been earlier mentioned, for their hospitality, companionship, support, encouragement and many facilities.

The author would like to acknowledge financial support from Faculty of Science, Chiang Mai University through Department of Geological Sciences and Igneous Rocks and Related Ore Deposits Research Laboratory, Department of Geological Sciences, Faculty of Science, Chiang Mai University, and Professor Dr. Yuejun Wang and Dr. Xiaoping Xia, State Key Laboratory of Isotope Geochemistry, Guangzhou Institute of Geochemistry, Chinese Academy of Sciences, Guangzhou, China, for REE analyses and great experience in China.

Finally, very special thanks are given to Kosuwan's family for their encouragement, as well as Mr. Eakjumroen Jundee and my son for their help throughout the study.

Patcharin Kosuwan Jundee
