ACKNOWLEDGEMENTS

I would like to express my sincere gratitude to my advisor and co-advisors, Dr. Worawit Janchai, Dr. Nopasit Chakpitak, Dr. Pradorn Sureepong who spent time discussing and sorting ideas, and provided me useful consultancy in the research framework.

This research would not have been possible without the cooperation of a number of people in Berlin, Germany, and Chiang Mai, Thailand. Importantly, I would like to express millions of thanks to Guenter for his endless support. I am also thankful to German executive managers Holger and Roland, who participated in several meetings and interviews. These meetings allowed me to understand more about work-life balance, managing the software business in Thailand and obstacles when dealing with Thai software developers. I feel very much grateful to the German software developers in Berlin (Sven, Ben, Anja) the German expatriate manager (Matthias), as well as the Thai software developers in Chiang Mai (Jek, Champ, Por, Ple, Montri, Else, Bank, Arm and Peter). Their participation in focus group discussions and questionnaires, along with their knowledge and work experience were a crucial part of the research case study.

Heartfelt thanks to Chern, Ohm, Jeab for sharing updating news about studies and work processes. I gain a lot of encouragement and inspiration from all of you. Special thanks are given to Paul for useful suggestions and good ideas to improve the thesis. I am also thankful to May for helping to draw beautiful illustrations.

To my beloved family: thank you mom for serving me good food and refreshing drinks while I worked hard on my thesis, and thank you to my dad, who took good care of my working room, keeping it inviting to help finish assignments. I can't believe that a plain room can become a five star hotel!

Last but not least, thanks to my lovely canine companions, Brown and Geegee, who always stayed around and played with me when I had to work alone – they helped me smile and relax.

Nipawan Mantalay
