ACKNOWLEDGMENT

This dissertation is a collaborative product involving a number of people. I would like to thank the effort of the many individuals who sacrificed time and effort to powerfully support this dissertation. Achieved by the grace of the generosity of the benefactors, friends, family and members of Namkian's community.

I am grateful first of all to my supervisor, Lect. Dr. Sidthinat Prabudhanitisarn who has shown the attitude and substance of a genius: he continually and persuasively conveyed a spirit of adventure in regard to academics, and sparked the ideas and had a cheerful attitude in regards to wisdom. Without his supervision and constant help this dissertation would not have been possible. My deep gratitude to Prof. Dr. Anurak Phunyanuwat and family, who transferred the experiences in the processes of researching, and gave commentaries, consultations, and also provided compassion and encouragement as always.

My deep regards and thanks to Assoc. Prof. Dr. Chukiat Leesuan who gave much advice and demonstrated a deep concern about the progress of this dissertation. My respectful acknowledgement goes also to Assoc. Prof. Dr. Somporn Sagawongse and Assoc. Prof. Dr. Orathai Mingthiphon who gave knowledge and understanding, and opened new perspectives in academics.

My deep regards and thanks Phra Kru Phitak Nantakhun as a role model who is a pioneer to restore and rehabilitate the motherland with love, devotion, sacrifice, and only holding to the common interest of his work. Moreover, I would like to thank friends from Hug Muang Nan Foundation who always sent encouragement and support information which was useful to write this dissertation.

My grateful thanks also to the community leader, Ajarn Chusilp Sararattana, the sub-district headmen, Mr. Promma Dee-pana and Mr. Khammoon Dee-promkhul, the leader group of 42 warriors, the members of the Namkian community, and others not mentioned by names. They devoted and provided useful information for supporting and withstanding the questions of the study again and again until the dissertation could be written successfully, I received help to express much appreciation to the staff

of the Department of the Sustainable Land Use and Natural Resource Management who assisted, supported, and coordinated so that this dissertation could be processed easily.

Furthermore I would like to acknowledge with appreciation the crucial role of the staff of Academic Affairs and Research, Office of Academic Services, Chiang Mai University who always provided encouragement and advice.

I respectfully thank all academics who endeavor to do social work who pioneer and create the body of knowledge to explore the understanding of the society. It has been reflected through a systematic research process. Finally, if this dissertation is useful in anyway, this researcher would like to create a new way for a conscious community forest management. All the parts involved in resource management in Thai society are humble to obtain information and other facts to combine and carry out the results which are close to the more perfect truth. If this dissertation has any faults due to discrepancies in the information or any other issues, I am prepared to accept that personally.

Banjit Sairorkham
