ACKNOWLEDGEMENTS

First of all, I would like to express my sincere gratitude to my supervisor, Prof. Dr. Sompong Dhompongsa, for his initial idea, guidance, encouragement and critical reading manuscript which enable me to carry out my doctoral study successfully.

I wish to express my deepest appreciation to Prof. Anthony To-Ming Lau for his kind hospitality and academic support while I was visiting the University of Alberta, Canada.

This work contains a number of improvement based on comments and suggestions provided by Prof. Dr. Suthep Suantai, Prof. Dr. Somyot Plubtieng, Assoc. Prof. Dr. Satit Seajung, and Asst. Prof. Dr. Bancha Panyanak. It is my pleasure to express my sincere thanks to them for their generous assistance.

It is my wish to give my warm regards to Asst. Prof. Dr. Gullaya Dhompongsa and Mrs. Alice Lau for their kind attention. Special acknowledgement and gratitude extends to all members in my family for their love and encouragement.

Moreover, I would like to thank all of my teacher for my knowledge, skill and their previous valued instruction while studying. I am also grateful to my seniors and friends at Department of Mathematics, Faculty of Science, Chiang Mai University. Unforgettably, I would like to thank the Development and Promotion of Science and Technology Talent Project (DPST) for give me a financial support.
