Acknowledgements	iii
Abstract in Thai	iv
Abstract in English	v
List of Figures	vii
Chapter 1 Introduction	1
1.1 Nonlinear Ergodic Theorems	2
1.2 Strong Convergence Theorems	3
Chapter 2 Basic Concepts and Preliminaries	7
2.1 Metric Spaces	7
2.2 Banach Spaces and Hilbert Spaces	10
2.3 Fixed Point Theorems for Nonexpansive Semigroups	14
2.4 CAT(0) Spaces	16
2.4 Weak Convergence in CAT(0) Spaces	21
2.5 Convex Combination in CAT(0) Spaces	23
Chapter 3 Δ –Convergence Theorems for Nonexpansive Semigroups on CAT(0) Spaces	26
3.1 Δ –Convergence Theorems	26
3.2 Applications	34
Chapter 4 Approximation of a Common Fixed Point of Nonexpansive Mappings on Convex Metric Spaces	40
4.1 Strictly Convex Banach Spaces	40
4.2 CAT(0) Spaces	46
Chapter 5 Approximation of a Common Point on CAT(0) Spaces	49
4.1 Strong Convergence Theorems	49
4.2 Applications	57
Bibliography	60
Vita	65

LIST OF FIGURES

Figure	Page
2.1 Geodesic segment	17
2.2 Geodesic triangle in a CAT(0) space and its comparison triangle	17
2.3 An example of CAT(0) space	18
2.4 The nearest point projection	19
2.5 Property (N)	20
2.6 The $\mathbb{R}$ -tree in Example 2.49	23
2.7 Convex combination of three points in a CAT(0) space	24
4.1 Example 4.4	45
5.1 The first step of our iteration scheme for sets A and B	54
