## ACKNOWLEDGEMENTS

There are many wonderful persons who kindly assisted, encouraged, and supported me throughout my doctoral study and the dissertation process. Without their help, the completion of the Ph.D. program and this dissertation would not have been possible.

I would like to express my sincere gratitude and appreciation to Assistant Professor Dr. Sirirat Panuthai, my advisor, for encouraging, insightful guidance and invaluable advice. I am deeply grateful to Assistant Professor Dr. Taweeluk Vannarit and Professor Emeritus Dr. Wichit Srisuphan, my co-advisors, for their time, insightful supervision, and needed guidance too.

My deep appreciation is extended to Assistant Professor Dr. Seepan Kantawang, Assistant Professor Dr. Thitinut Akkadechanunt, and Assistant Professor Dr. Porntip Malathum, my examining committee members, for their intellectual suggestions and recommendations to strengthen the dissertation.

I would like to acknowledge and thank all persons with hypertension who participated in this research. I will never forget their willingness to share their information and the warm welcome they generously gave me. I am thankful for the cooperation and assistance in along the data collection process from nurses and other health care providers who work at the four hypertension clinics, Maemoh Hospital, Kokha Hospital, Sobprab Hospital and Chaehom Hospital.

My appreciation is extended to my doctoral classmate and friends for sharing knowledge, experience, friendship, and assistance, and for making my study not only academically but also personally rewarding.

I am truly indebted to my director and colleagues at Boromarajajonani College of Nursing, Nakorn Lampang, for the contribution and allowing me the full time of my study. My sincere gratitude goes to Phaboromarajchanok Institute for Health Workforce Development at Office of Permanent Secretary of the Thailand Ministry of Public Health for supporting scholarship for my study. I also would like to thank the Thailand Nursing and Midwifery Council which granted partial funding for this dissertation.

Last but not least, my heartfelt gratitude and appreciation is extended to my beloved mother who always loves, encourages, and supports me in my accomplishment of a doctoral degree and also takes care of my child during my doctoral study. My special gratitude also goes to my beloved husband and my beloved child their support which encouraged me to be successful in my study.

Ekkarat Pinrapapan
