ACKNOWLEDGMENTS

This thesis would not be completed without the assistance of several people whom I wish to thank. Firstly, I would like to express my sincere gratitude to my supervisor, Assoc. Prof. Dr. Chaiwat To-anun, for his encouragement and valuable advice as well as Prof. Dr. Robert J. McGovern and Asst. Prof. Dr. Malee Thungrabeab. I appreciated the support, advice and critical comments from my co-advisors and the examining committee member, Assoc. Prof. Dr. Kasem Soyong, Assoc. Prof. Dr. Nuchnat Jonglaekha Lect. Dr. Sarunya Valyasevi and Lect. Dr. Ratchadawan Cheewangkoon.

I also thank my classmates and junior students including the officers of the Plant Pathology Division, Department of Entomology and Plant Pathology, Faculty of Agriculture at Chiang Mai University and my colleague of Highland Research and Development Institute for giving me the assistance during research. Moreover, I am also grateful to significance farmers “Loung Noy and Loung Koung” and staffs of Mae Sapok Royal Project Foundation for valuable field experiments.

I would particularly thank to my regarded Director of Royal Project Foundation, Highland Research and Development Institute and Dean, Faculty of Agriculture at Chiang Mai University. Their encouragement provided a great incentive all time.

Finally, the special word for thank also go to my parents and family members who provided endless support, powerful and concern. This thesis, I dedicate to all appropriative persons.

Sumalee Mensin
