## ACKNOWLEDGEMENTS

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here.

First, I would like to express my gratitude to my principal supervisor, Assoc. Prof. Dr. Siriporn Okonogi, Department of Pharmaceutical Science, Faculty of Pharmacy, Chiang Mai University, for the useful comments, remarks and engagement through the learning process of this thesis. This thesis would not have been possible without the help, support and patience of my principal supervisor. Furthermore I would like to thank Asst. Prof. Dr. Songwut Yotsawimonwat, my co-advisor, for introducing me to the topic as well for the support on the way. Also, I would like to thank Dr. Suganya Tachakittirungrod, my co-advisor for the useful suggestion. They have intensively helped, led and advised me to solve problems and to complete this thesis.

I am also thankful to Asst. Prof. Dr. Songyot Anuchapreeda, Department of Biochemistry, Faculty of Medicine, Chiang Mai University, and his staffs for cell viability assay. I would like to thank Miss Rungthip Kawaree, Department of Biotechnology, Faculty of Science, Maejo University for providing facilities for gas chromatography and mass spectrometry.

I would like to acknowledge the financial, academic and technical support of the Faculty of Pharmacy, Chiang Mai University and the Graduate School of Chiang Mai University for their financial support.

iii

I am most grateful to Praboromarajchanok Institute for Health Workforce, Development, Ministry of Public Heath, for providing me financial support. I would like to thank Sirindhorn College of Public Health, Phitsanulok Province, my workplace, for permission me to do the research for this doctoral degree.

Finally, I sincerely appreciate my parents, my family, all my teachers and friends for their love, tolerance, understanding and encouragement throughout this study. Without all these persons mentioned above, this thesis would not have been developed and completed.

Kiattisak Saeio
