	Page
ACKNOWLEDGMENTS	iii
ABSTRACT IN ENGLISH	vi
ABSTRACT IN THAI	viii
LIST OF TABLES	xii
LIST OF FIGURES	xiii
ABBREVIATIONS AND SYMBOLS	xiv
CHAPTER I INTRODUCTION AND OBJECTIVES	1
1.1 Background and rationale	1
1.2. Objectives of the study	4
CHAPTER II LITERATURE REVIEW	5
2.1 Human foodborne disease situation	5
2.2 Classification of slaughterhouses in the Philippines	7
2.3 Pig slaughter lines in the Philippines	8
2.4 Hygiene indicator microorganisms	10
2.4.1 Total Viable Count (TVC)	10
2.4.2 <i>Enterobacteriaceae</i>	11
2.4.3 Coliforms and <i>E. coli</i>	12
2.5 Foodborne pathogenic bacteria	13
2.5.1 Pathogenic <i>E. coli</i>	13
2.5.2 <i>Salmonella</i>	14
2.6 Contamination during slaughter	16
2.6.1 Contamination in lairage	17
2.6.2 Contamination in the slaughter process	18
2.7 Slaughter of swine and cleaning and disinfection	19

CHAPTER III MATERIALS AND METHODS	21
3.1 Study scope	21
3.2 Sampling	21
3.2.1 Sample collection	21
3.2.2 Sample size and sampling strategy	22
3.2.3 Sampling techniques	22
3.2.4 Sampling sites	23
3.3 Microbiological procedures	24
3.3.1 Decimal dilution of test samples	24
3.3.2 Total Viable Count	25
3.3.3 Isolation and enumeration of <i>Enterobacteriaceae</i>	25
3.3.4 Detection of <i>E. coli</i> and coliforms	27
3.3.5 Detection of <i>Salmonella</i>	28
3.4 Calculation of TVC and <i>Enterobacteriaceae</i> counts	30
CHAPTER IV RESULTS	31
4.1 Total Viable Count (TVC) and <i>Enterobacteriaceae</i> count	31
4.2 Water samples: Most Probable Number (MPN) of <i>E. coli</i> and coliforms	35
4.3 Detection of <i>Salmonella</i>	37
4.4 Profile of slaughterhouses involved in the study	43
CHAPTER V DISCUSSION AND CONCLUSIONS	46
5.1 Discussion of microbiological test results	46
5.1.1 TVC and <i>Enterobacteriaceae</i> counts	46
5.1.2 Detection of <i>E. coli</i> and coliforms in water samples	48
5.1.3 Detection of <i>Salmonella</i>	49
5.2 Conclusions of the study	53
REFERENCES	54
APPENDIX	63
DECLARATION	67
CURRICULUM VITAE	68

LIST OF TABLES

Table		Page
1	Classification of slaughterhouses by the National Meat Inspection Service (NMIS), Philippines	8
2	Present number of serovars in each <i>Salmonella</i> species and subspecies	14
3	Sample size and sampling strategy	22
4	Total Viable Counts and <i>Enterobacteriaceae</i> counts in environmental and carcass swabs	31
5	Mean values for TVC and <i>Enterobacteriaceae</i> count in environmental sites and carcasses from both unaccredited and accredited slaughterhouses	32
6	Mean values for TVC in environmental sites and carcasses sampled in unaccredited and accredited slaughterhouses	33
7	Mean values for <i>Enterobacteriaceae</i> counts in environmental sites and carcasses sampled in unaccredited and accredited slaughterhouses	34
8	<i>Salmonella</i> in environmental and carcass samples	37
9	<i>Salmonella</i> in environmental and carcass samples in unaccredited and accredited slaughterhouses	38
10	Occurrence of <i>Salmonella</i> in unaccredited and accredited slaughterhouses	41
11	Comparison of accredited and unaccredited slaughterhouse facilities and operations	43

LIST OF FIGURES

Figure		Page
1	Medium-scale pig slaughtering on a tiered floor	9
2	Most Probable Number (MPN) of coliforms and <i>E. coli</i> detected in water samples from an unaccredited slaughterhouse in NCR	35
3	Most Probable Number (MPN) of coliforms and <i>E. coli</i> detected in water samples from an accredited slaughterhouse in NCR	36
4	<i>Salmonella</i> positive environmental sites by percentage	39
5	Percentage of <i>Salmonella</i> positive environmental samples in accredited slaughterhouses	40
6	Percentage of <i>Salmonella</i> positive environmental samples in unaccredited slaughterhouses	40
7	<i>Salmonella</i> serotypes of isolates from environmental and carcass samples in percent	42

ABBREVIATIONS AND SYMBOLS

APHCA	Animal Production and Health Commission for Asia and the Pacific
ASEAN	Association of South East Asian Nations
BAS	Bureau of Agricultural Statistics (Philippines)
BAI	Bureau of Animal Industry (Philippines)
BGA	Brilliant Green Agar
BPW	Buffered Peptone Water
cfu	Colony Forming Units
CI	Confidence Interval
DA	Department of Agriculture (Philippines)
DOH	Department of Health (Philippines)
D-LSB	Double-strength Lauryl Sulfate Broth
FAO	Food and Agriculture Organization
GMP	Good Manufacturing Practices
HACCP	Hazard Analysis and Critical Control Points
ISO	International Organization for Standardization
KAP	Knowledge, Attitudes and Practices
LGU	Local Government Unit
MIL	Motility Indole Lysine
MKTTn	Mueller-Kauffmann Tetrathionate/Novobiocin
MPN	Most Probable Number
MRD	Maximum Recovery Diluent
NA	Nutrient Agar
NCR	National Capital Region (Philippines)
NMIS	National Meat Inspection Service (Philippines)
PCA	Plate Count Agar
RV	Rappaport-Valliadis

The background of the page features a large, faint watermark of the Chiang Mai University seal. The seal is circular, with an elephant in the center, a sunburst above its head, and the university's name in Thai and English. The English text 'CHIANG MAI UNIVERSITY 1964' is written around the bottom half of the circle.

SD	Standard Deviation
S-LSB	Single-strength Lauryl Sulfate Broth
SSOP	Standard Sanitary Operating Procedures
TSI	Triple Sugar Iron
TVC	Total Viable Count
TW	Tryptone Water
WHO	World Health Organization
WHO-Salm	WHO Collaborating Center for Reference and Research on <i>Salmonella</i>
VRBD	Violet Red Bile Dextrose
XLT-4	Xylose Lysine Tergitol-4
