Dr. Tongkorn Meeyam (CMU)

ACKNOWLEDGMENTS

I would like to express my gratitude to the Deutscher Akademischer Austausch Dienst (German Academic Exchange Service) DAAD for granting me the opportunity and means through my scholarship to be able to further my professional career and my learning in this course.

I would like to thank Assoc. Prof. Dr. Lertrak Srikitjakarn, Dean of Faculty of Veterinary Medicine, Chiang Mai University and Prof. Dr. Karl-Hans Zessin, Program Director for International Animal Health, Freie Universität Berlin for their invaluable support and leadership in the Joint FUB-CMU MVPH Program.

I want to express my profound thanks to my FUB Advisor, Prof. Dr. Reinhard Fries whose expertise and critical thinking has been a constant source of wisdom and inspiration from the time this project was conceptualized, implemented and to when it was finally completed. It is a great honor and privilege, and a truly priceless learning experience to have been taught by him.

My sincerest gratitude goes to my CMU Advisor, Dr. Tongkorn Meeyam who has kept the direction of this study true and steady. It is her guidance, understanding, and selflessness in sharing her time and seemingly unending patience in explaining even the tiniest details, which have always kept me on the right path to be able to complete this study.

I am very thankful to the lecturers, trainors and laboratory staff from the Faculty of Veterinary Medicine, CMU and Faculty of Veterinary Medicine, FUB throughout this course for giving their invaluable time, effort and enthusiasm in imparting us with necessary knowledge and skills to attain our degrees.

I would also like to express my appreciation for the Veterinary Public Health Center for Asia Pacific (VPHCAP), Faculty of Veterinary Medicine, Chiang Mai University under the leadership of Assist. Prof. Dr. Khwanchai Kreausukon and support of the staff who have always provided us with assistance to get us through the course.

Our stay in FUB would not have been the memorable experience that it was without the guidance of Dr. Maximilian Baumann and patience of our tutors, Dr. Antje Hoppenheit and Dr. Jana Roller and other staff who went beyond their duties to attend to our every need and adapt to our peculiarities.

I am grateful for the extensive and thorough training provided by Prof. Dr. Peter Paulsen, Dr. Agathe Pfeifer, Dr. Nattakarn Awaiwanont, and other staff during our laboratory practice at the Institute of Meat Hygiene, University of Veterinary Medicine, Vienna.

Special thanks to Assist. Prof. Dr. Duangporn Pichpol and Dr. Veerasak Punyapornwithaya for their generosity in providing inputs and knowledge on the methodology and data analysis of this study. And to Group 1 and Group 2 of the 71st batch of Veterinary Students of CMU for the great company and assistance during my sample collection and laboratory procedures practice.

This study would not have been possible without the approval and consent of Dr. Minda S. Manantan, Executive Director, National Meat Inspection Service (NMIS) who welcomed and ardently supported the conduct of the study.

I would also like to acknowledge Dr. Mildred Salangan of NMIS-NCR and Dr. Orlando Ongsotto of POID, NMIS-CO for their help in coordination for the conduct of sample collection in slaughterhouses.

I am very grateful for the assistance provided by Ms. Rayne Bigay and staff of the NMIS Central Meat Laboratory: Ms. Lisa Nilo, Ms. Gemma Borja, Ms. Remedios

Micu, Ms. Merriam Nival, Ms. Evelyn Embestro, Mr. Prudencio Nambong, Ms. Noraida Yap, Ms. Danica Dimaya, Ms. Mila Soliven, and Ms. Amorlina Arciaga. And to Dr. January Magcalas-Nones for sharing much of her time, knowledge and valuable inputs.

I am truly thankful and humbled by the all-out support and help provided by the Valenzuela City Veterinary Services Office headed by Dr. Basil Sison. One could not have a better team than that of Dr. Wilfredo del Castillo, Dr. Carlo Abad, Dr. Allan Alinea and Mr. Jomel Matutina of the CVSO Extension Services Unit who were with me until the wee hours of the morning during every single sample collection day.

To my friends, batchmates and now fellow graduates of the 5th MVPH course, it truly is a bittersweet feeling to be happy and finally done and ready to go back to our lives and families, but at the same time having to say goodbye to people who you have come to know and love as “family”. Again, thank you for the tons of laughter and memories to last a lifetime.

I would like to express my deepest gratitude to my parents, Samuel and Levita Castro. All my life you have both been my conscience and spiritual guides, never failing to pray over me from the happiest moments of success, to the most trying of times. And to my siblings, nieces and nephew, for keeping me sane by using every means and available technology for me to be able to be up-to-date on life back home, even to the point of making it possible for me to “attend” all family gatherings either as a phone, a tablet or a laptop.

To Dr. Sharon Lorene Ga, for simply being the reason for me to perform exceptionally in every little thing I do, for always believing in me, and giving me something to strive for and look forward to in life.

To God, to whom I consecrate my every trial, and dedicate my every triumph.

Samuel Joseph Manglapus Castro
