## ACKNOWLEDGEMENT

I would like to express appreciation and gratitude to my supervisor, Assoc. Prof. Dr. Suchada Vearasilp for her invaluable guidance and support of the graduate study. Acknowledgement is also expressed to Assoc. Prof. Dr. Therdchai Vearasilp, for constructive suggestions, to Prof. Dr. Wolfgang Luecke, Dr. Dieter von Hoersten for support and their kindly cooperation between Chiang Mai University and the University of Goettingen. I am deeply grateful to Assoc. Prof. Dr. Soontorn Khamyong, Dr. Viboon Changrue and Dr. Sangtiwa Suriyong for their willingness to be advisor and examiner, and for his instructive comments. I warmly thanks to Assoc. Prof. Dr. Vichian Hengsawad for his interest during the investigation have been very helpful for this study.

Furthermore, I want to say honorable thanks to Prof. Dr. Dumnern Karladee for providing purple rice grain for my experiments. My investigation for this thesis was successfully done through the use of several scientific techniques and instruments. Therefore, I express my gratitude to my colleagues at The Postharvest Research Institute and Seed Science and Technology Laboratory, Chiang Mai University for their assistance and helps.

Finally, high pleasure is due to my family for all their love, encouragement, and support throughout the study period.
