## ACKNOWLEDGEMENT

Before the start of this dissertation, I would like to spend this pages to express my gratitude to many individuals who provide assistance during my Master's Degree study.

Firstly, I would like to thank you my supervisor, Dr. Siramas Komonjinda. She always gives me suggestions and teaching when I have any problem, including work for Astronomy club.

Many suggestions on my research came from my co-supervisor, Dr. David Mkr-tichian, whom I also thank. He always patiently listen to my English from the day he cannot understand any of my sentence until now he already understand some. My English have been improving. And also describing Astronomy to me, even though some time I did not understand, he would repeated it over and over for me. And thank to you my supervisor again who brought me to work with him. Further, I would like to deserve my acknowledgment to every lectures in astronomy laboratory, Dr. Wichean Kriwattanawro-ng, ML. Aniwat Sooksawat, Dr. Suwicha Wannawichian and Aj. Arthit Laphiratannakal for many suggestions while I studied.

I would like to thank many people in Astronomy Club for special time while I was an undergraduate student. I had fun with them and all of this became my inspiration to study in astronomy subject.

During this research, I have financial support from Graduate school and National Astronomical Research Institute of Thailand.

Finally, I would like to thank my family for their understanding and support me until I finish this thesis.

**Jessada Keeratibharat**
