Abstract in Thai	e
Abstract in English	h
List of Tables	m
List of Figures	o
List of Abbreviations	p
Chapter 1 Introduction	1
1.1 Historical Background	3
1.2 Research Objectives	5
Chapter 2 Literature Review	6
2.1 Climate variability and its impacts on rice production	6
2.2 Seasonal Weather Forecasts	9
2.3 Theory of Planned Behavior	16
2.4 Cronbach Alpha Coefficient	19
2.5 The Structural Equation Model (SEM)	20
Chapter 3 Research Methods	25
3.1 Conceptual Framework	25
3.2 Methodological Framework	26
3.3 Research Methodology of Third Objective	28
3.4 Research Methodology of Second Objective	30
3.5 Research Methodology of Third Objective	32

Chapter 4 Study Site Description	38
4.1 General Natural Condition	38
4.2 Social Economic Characteristics	41
4.3 Agricultural Production Structure	45
4.4 Rice Production in Nam Dong District	47
4.5 Information of the Sample Households	53
4.6 Seasonal Weather Forecasts System Status	56
Chapter 5 Impact of Climate Variability on Rice Production	59
5.1 The Rice Yield Change and the Variability of Climate Factors	59
5.2 Regression Analysis of Impact of Climate Factors on Rice Yield	65
5.3 Qualitative Analysis of Impact of Climate Factors on Rice Production	68
Chapter 6 Seasonal Weather Forecast Data Use in Rice Production Decisions	75
6.1 Farmer’s Seasonal Weather Forecast Data Use	75
6.2 Rice Production Decisions Relating to Seasonal Weather Forecast Data	87
Chapter 7 Factors Influencing on Farmer’s Use of Seasonal Weather Forecast Data in Rice Production Decisions Making	93
7.1 Developing the Dependent Variable for Study Model	93
7.2 Farmers’ Attitude Factor that Influencing on SWF Use	96
7.3 Subjective Social Norm Factor Influencing on Farmers’ SWF Use	99
7.4 Perceived Control Factor Influencing on Farmer’s SWF Use	103
7.5 Testing of the Measurement Model by Confirmatory Factor Analysis	106
7.6 Structural Equation Modelling of Final Study Model	110
Chapter 8 Conclusions and Recommendations	113
8.1 Conclusions	113
8.2 Recommendation	117
References	121

Appendix	132
Appendix A	132
Appendix B	133
Appendix C	136
Appendix D	139
Appendix E	142
Appendix F	144
Appendix G	146
Curriculum vitae	174

## LIST OF TABLES

	Page
Table 3.1 The use of SWFs in rice famers' decisions	34
Table 3.2 Outcome beliefs of using SWFs on rice productions	35
Table 3.3 Social groups view influence on farmer's SWF use	36
Table 3.4 Perceived control factor influence on rice famer's SWF use	37
Table 4.1 Land types in Nam Dong district, 2012	41
Table 4.2 General profile of Nam Dong district, 2012	42
Table 4.3 District infrastructure condition of Nam Dong district, 2012	43
Table 4.4 Area under Annual and Perennial Crop	46
Table 4.5 Paddy rice seasonal calendar	49
Table 4.6 Winter-spring rice varieties and their calendars	51
Table 4.7 Summer-autumn rice varieties and their calendars	51
Table 4.8 Characteristic of the sampled households	54
Table 4.9 Rice area and fallow of sampled households	55
Table 4.10 Irrigation and rice land characteristic of sampled households	55
Table 5.1 Tests of normality of rice yield (dependent variables)	65
Table 5.2 Estimate of ordinary least square for winter-spring rice season	67
Table 5.3 Estimate of ordinary least square for summer-autumn rice season	68
Table 5.4 Weather events over the last ten years	69
Table 5.5 Losses of rice production cause by climate variability over 10 years	73
Table 6.1 The Seasonal weather forecast types in study area	80
Table 6.2 SWF sources in study area	81
Table 6.3 The farmer's perception on the important of SWF attributes	85
Table 6.4 Key decisions in rice production decisions as related to SWF data	88
Table 7.1 The farmer's statement of SWFs use in rice production decisions	94

Table 7.2	Farmers reporting the in SWF use in rice production decisions	95
Table 7.3	Validity of indicators of farmer's SWF data use	96
Table 7.4	Farmers' attitude about benefit of SWF use in rice production	97
Table 7.5	Percentage of farmer's attitude about SWF use benefits	98
Table 7.6	Validity farmer's attitude indicators	99
Table 7.7	Subjective social norm indicators	100
Table 7.8	Farmer's view of influence of social groups on farmer's SWF use	101
Table 7.9	Validity of indicators of subjective norm factor	102
Table 7.10	Perceived controls indicators to farmer's SWF use	103
Table 7.11	Farmers perception on perceived controls in SWF use	104
Table 7.12	Validity of indicators of perceived control factors	105
Table 7.13	Indications of measurement model	106
Table 7.14	The goodness of fit indices of the measurement model	107
Table 7.15	Validity of measurement model	108
Table 7.16	Correlation between constructs	109
Table 7.17	The goodness of fit indices of final model	110

## LIST OF FIGURES

	Page
Figure 2.1 Theory Framework of planned behavior	17
Figure 3.1 Research conceptual framework	25
Figure 3.2 Methodological framework of study	27
Figure 3.3 Study theory model	33
Figure 4.1 Research study area	39
Figure 4.2 Labour structure in district economic sectors	42
Figure 4.3 Production value of different economic sectors	44
Figure 4.4 Production value of agricultural sectors	45
Figure 4.5 Rice area distribution over 20 year in Nam Dong district	48
Figure 4.6 Weather forecast system in Vietnam	57
Figure 5.1 Paddy rice yield change over 27 years in Nam Dong	60
Figure 5.2 The variability of maximum temperature and its CVs over 27 years	61
Figure 5.3 The variability of minimum temperature and its CVs over 27 years	62
Figure 5.4 The variability of rainfall by seasons and its CVs over 27 years	64
Figure 6.1 Farmer's seasonal weather forecast accessing	76
Figure 6.2 Influence scale of seasonal weather forecast data on rice production	77
Figure 6.3 Sources of the seasonal weather forecast data of farmers	84
Figure 7.1 The result of SEM analysis of factor influence on farmer's SWF use	111

## LIST OF ABBREVIATIONS

ADP	Adaptation
ADPC	Asian Disaster Preparedness Centre
ARDD	Agricultural and Rural development Department
IPCC	Intergovernmental Panel on Climate Change
MNL	Multinomial logit
°C ‘ ‘	Degree Celsius – minute – second of latitude and longitude
AMOS	Analysis of Moment Structures
Averain	Average rainfall (mm)
CFA	Confirmation factor analysis
CFI	Comparative fit index
CV	Coefficient variation
Df	Degree of freedom
GDP	Gross domestic product
GFI	Goodness-Fit Index
GOF	Good-of-fit
Ha	Hectare
kg	Kilogram
km	kilometre
maxT	average maximum temperature (0C)
minT	average maximum temperature (0C)
mm	millimetre
OLS	ordinary least squares
PRA	Participatory rural appraisal
RMSEA	Root mean square error of approximation
SA	Summer – autumn
SEM	Structural equation modelling
Sig.	Significant level
SPSS	Statistical software package for social sciences

SWF	Seasonal weather forecast
TLI	Tucker Lewis index
TPB	Theory planned behaviour
WS	Winter - season
