ACKNOWLEDGEMENT

I would like to express my deepest sincere thanks to my supervisor, Dr. Pitchaya Mungkornasawakul, for her practical training, valuable suggestions, tremendous patience, and excellent encouragement throughout this work from the beginning until completion of the thesis.

My sincere thanks are expressed to Dr. Nopakarn Chandet for her kindly advice and support, especially in part of microbiology, Asst. Prof. Dr. Sunanta Wangkarn for her valuable advice, attentive teaching and practical training, especially in part of gas chromatography and Dr. Ruttaporn Chundet for his assistance on my thesis examination as chairman and their valuable suggestions and patients in discussion of my thesis work.

I am also deeply grateful to Dr. Angkhana Inta for her collection and identification of plant materials and kindness.

I would like to thank the academic staffs in the Department of chemistry, Faculty of Science, Chiang Mai University for their technical help particularly Mr. Chinnapat Sirithanyarote for useful help in GC-MS operating and kind assistance.

I wish to express my appreciation to the Science Achievement Scholarship of Thailand (SAST) for the financial support, National Research Universities (NRU) and Graduate School of Chiang Mai University for the partial support.

I would like to thank my friends and members of Dr. Pitchaya research groups for their help and warm friendship. Finally, I gratefully, thank you my beloved family for their encouragements and supporting me at the period of my study.

Sopit Phetsang
