Abstract in English	vi
Contents	vii
List of Tables	x
List of Figures	xii
List of Abbreviations and Symbols	vii
Chapter 1 Introduction	1
1.1 Phosphates in the seafood industry	1
1.2 Determination of phosphate	2
1.3 Principle of phosphate test	8
1.4 Digital image - based colorimetry	8
1.5 The aims of this research	8
Chapter 2 Experimental	9
2.1 Molybdenum blue method	9
2.1.1 Chemicals	9
2.1.2 Reagent and solution preparations	9
2.1.2.1 Preparation of standard solution	9
2.1.2.2 Preparation of reagents	10
2.1.2.2.1 Ammonium molybdate tetrahydrate solution	10
2.1.2.2.2 L-Ascorbic acid solution	10
2.1.2.2.3 Sulfuric acid solution	10
2.1.2.2.4 Potassium antimony(III) oxide tartrate solution	10
2.1.2.2.5 Mixed reagent	10

CONTENTS (CONTINUED)

	Page
2.1.2.3 Single standard method for phosphate determination	10
2.2 Determination Phosphate by using Phosphate test with mobile phone	11
2.2.1 Equipment/Apparatus	11
2.2.2 Method	12
2.2.2.1 Sample preparation	12
2.2.2.2 Determination of phosphate by using the test strips	12
2.2.2.3 Measurement the R intensity by using application of an iPhone4S	13
2.3 Linear of calibration curve from R intensity	15
2.4 The control light box	15
Chapter 3 Results and discussion	17
3.1 Selection of optimum condition for RGB intensity	17
3.1.1 The measurement of background from different areas on the standard chart	17
3.1.2 The measurement of background from different points around test strip	20
3.1.3 Study the relationship between the RGB intensity and phosphate concentration	22
3.1.4 Comparison of the relationship between R intensity of phosphate concentration on standard chart and phosphate standard solution	23
3.2 Optimization for the phosphate test strip use	25
3.2.1 Using the phosphate test strip with standard solution	25
3.2.2 Holding time	26

CONTENTS (CONTINUED)

	Page
3.2.3 The times for develops color of the test strips	27
3.3 Limit of detection	29
3.4 Sample preparation	30
3.4.1 The ratio of the sample with water for extraction	30
3.4.2 Sampling	32
3.4.3 Optimization of the vortex time	33
3.4.4 %Recovery study	33
3.5 Application to on-site analysis assay	34
3.5.1 The new equipment for on-site analysis	38
3.5.2 Comparison of phosphate concentration obtain between digital image analysis and necked eye by test strips	39
Chapter 4 Conclusion	41
References	42
Appendix	45
Appendix A	45
Appendix B	46
Appendix C	48
Appendix D	50
Appendix E	52
Curriculum Vitae	55

LIST OF TABLES

		Page
Table 1.1	Analytical methods applied to the determine of phosphate in different samples	3
Table 1.2	determination of phosphate in soil and water samples by molybdenum blue method	7
Table 3.1	The effect of background area on R intensity measurement	18
Table 3.2	The effect of background area on G intensity measurement	18
Table 3.3	The effect of background area on B intensity measurement	19
Table 3.4	R intensity from 6 points around the test strips	20
Table 3.5	G intensity from 6 points around the test strips	21
Table 3.6	B intensity from 6 points around the test strips	21
Table 3.7	The results of R intensity obtained from dipping or dropping the strips in the 50 ppm standard phosphate solution and treated with the sulfuric acid for different timing	25
Table 3.8	R intensity obtained	26
Table 3.9	Equations from the calibration graph (the relationship to the R intensity of the phosphate concentration (10-100 mgPO ₄ ³⁻ /L)) with various the timing for color development	29
Table 3.10	RGB intensities of blank, 10 mg/L on the standard chart together with background	30
Table 3.11	the results of phosphate concentration from the test strips with the digital image analysis and the molybdenum blue method	31
Table 3.12	Phosphate contants (mgPO ₄ ³⁻ /kg) in sampling stud	32
Table 3.13	The phosphate concentrations in the frozen murrell fish sample at different vortex times	33

LIST OF TABLES (CONTINUED)

	Page
Table 3.14 Recoveries of the method	34
Table 3.16 Phosphate contents found in Day 1	36
Table 3.17 Phosphate contents found in Day 2	37
Table 3.18 Comparison the phosphate concentration between digital image analysis and necked eye 10 people (day 1)	38
Table 3.19 Comparison the phosphate concentration between digital image analysis and necked eye 10 people (day 2)	40

LIST OF FIGURES

		Page
Figure 2.1	Light control unit	16
Figure 3.1	Image obtained from taking the standard chart of phosphate test in the white box with the background area that was chosen to measure RGB intensity of background (----), (—) and (.....)	17
Figure 3.2	Image of the standard chart and the test strips taken in the white box and 6 measure points of background of the strips	20
Figure 3.3	Relationship between R,G and B intensity and phosphate concentration from 10 to 500 mgPO ₄ ³⁻ /L	22
Figure 3.4	Relationship between RGB intensity and phosphate concentration from 10 to 100 mgPO ₄ ³⁻ /L	23
Figure 3.5	Relationship of R intensity of phosphate concentration from standard chart and phosphate standard solution	24
Figure 3.6	The relationship between R intensity and concentration of phosphate from standard solution range 10 to 100 mgPO ₄ ³⁻ /L	24
Figure 3.7	Overlay the R intensity of the strips that study repeat 5 times; (■) dipping the strip in the 50 ppm phosphate standard solution then drop the sulfuric acid solution on reaction zone stand for 15 sec and removing the solution; (●) dropping	26
Figure 3.8	The relationship between R intensity with various timing for color development	28
Figure 3.9	The relationship between the R intensity of the phosphate concentrations (10 to 100 mgPO ₄ ³⁻ /L) with various timing for color development	28
Figure 3.10	The test strip with blank solution	30

LIST OF FIGURES (CONTINUED)

	Page
Figure 3.11 The relationship between the phosphate concentration (mgPO ₄ ³⁻ /kg) with the sampling of various weights	32
Figure 3.12 The locations of seafood markets around Chiang Mai	35
Figure 3.13 The calibration graph (R intensity with phosphate concentration (mgPO ₄ ³⁻ /L)) for day 1	36
Figure 3.14 The calibration graph (R intensity with phosphate concentration (mgPO ₄ ³⁻ /L)) for day 2	37

LIST OF ABBREVIATIONS AND SYMBOLS

DI	deionization
min	minute
S.D	standard deviation
R, G, B	red, green, blue values
PM	post meridiem
