ACKNOWLEDGEMENT

The present thesis would not have been possible without the support, advice, help and encourage from those who have provided the knowledge and wisdom

Firstly, I would like to express my deepest gratitude and sincere appreciation to my thesis supervisor, Lect. Dr. Pathairat Pastpipatkul. In the final stages of the work, he has been helpful and has supported me in numerous ways in order to achieve this work. Moreover, he believed in me and suggested a new topic study and methodology which give me a passion for doing this thesis.

Thank are due to Lect. Dr. Chukiat Chaiboosri for his contributions a good advices in concept, model, and the estimation techniques in financial econometrics, particularly Markov-Switching model. Thank to Lect. Dr. Nachatchapong Kaewsompong for his clearly guidance of basically econometric and inspired me to do this thesis with advance econometric. This thesis could not have been completed without them.

I would also like to thank father and mother; and family members for their support in my whole life. Thanks to all my teachers for their effort to give me knowledge. This thesis is devoted to them.

Special thanks to my best friend Miss Paravee Maneejuk for her encourages and helps are every aspect throughout my thesis working. Any errors and short-coming remain of cause mine alone.
