ACKNOWLEDGEMENTS

I am deeply grateful to my thesis advisor, Professor Dr. Nipon Chattipakorn for his invaluable advice, patiently supervision, understanding, and constant encouragement throughout the research period. I am an engineer. So, I was not familiar with the Medical field, but his supervision could changed the fool like me to understand in the deeply details of my research. I would not have achieved this far and this thesis would not have been completed without all the support that I have always received from him.

I also would like to extend my sincere thanks to Associate Professor Dr. Siriporn Chattipakorn, Professor Dr. Bruce Kenknight, Associate Professor Dr. Nipon Theera-Umpon, Dr. Nattawit Promma, Dr. Krekwit Shinlapawittayatorn, and Dr. Punate Weerateerangkul for their helpful suggestions and valuable supports in both Medical and Engineering fields.

I am greatly appreciated Assistant Professor Tayard Deesuchit for being my examiner and for his valuable suggestions and comments that strengthen my thesis.

I would like to acknowledge the Thailand Research Fund for the financial support and Cardiac Electrophysiology Research and Training Center for laboratory facilities. I would like to thanks my surgeon's operation team, Dr. Kroekkiat Chinda, Dr. Siripong Palee, Dr. Sirirat Surinkeaw and Jantira Sanit, for their supports throughout the hard time.

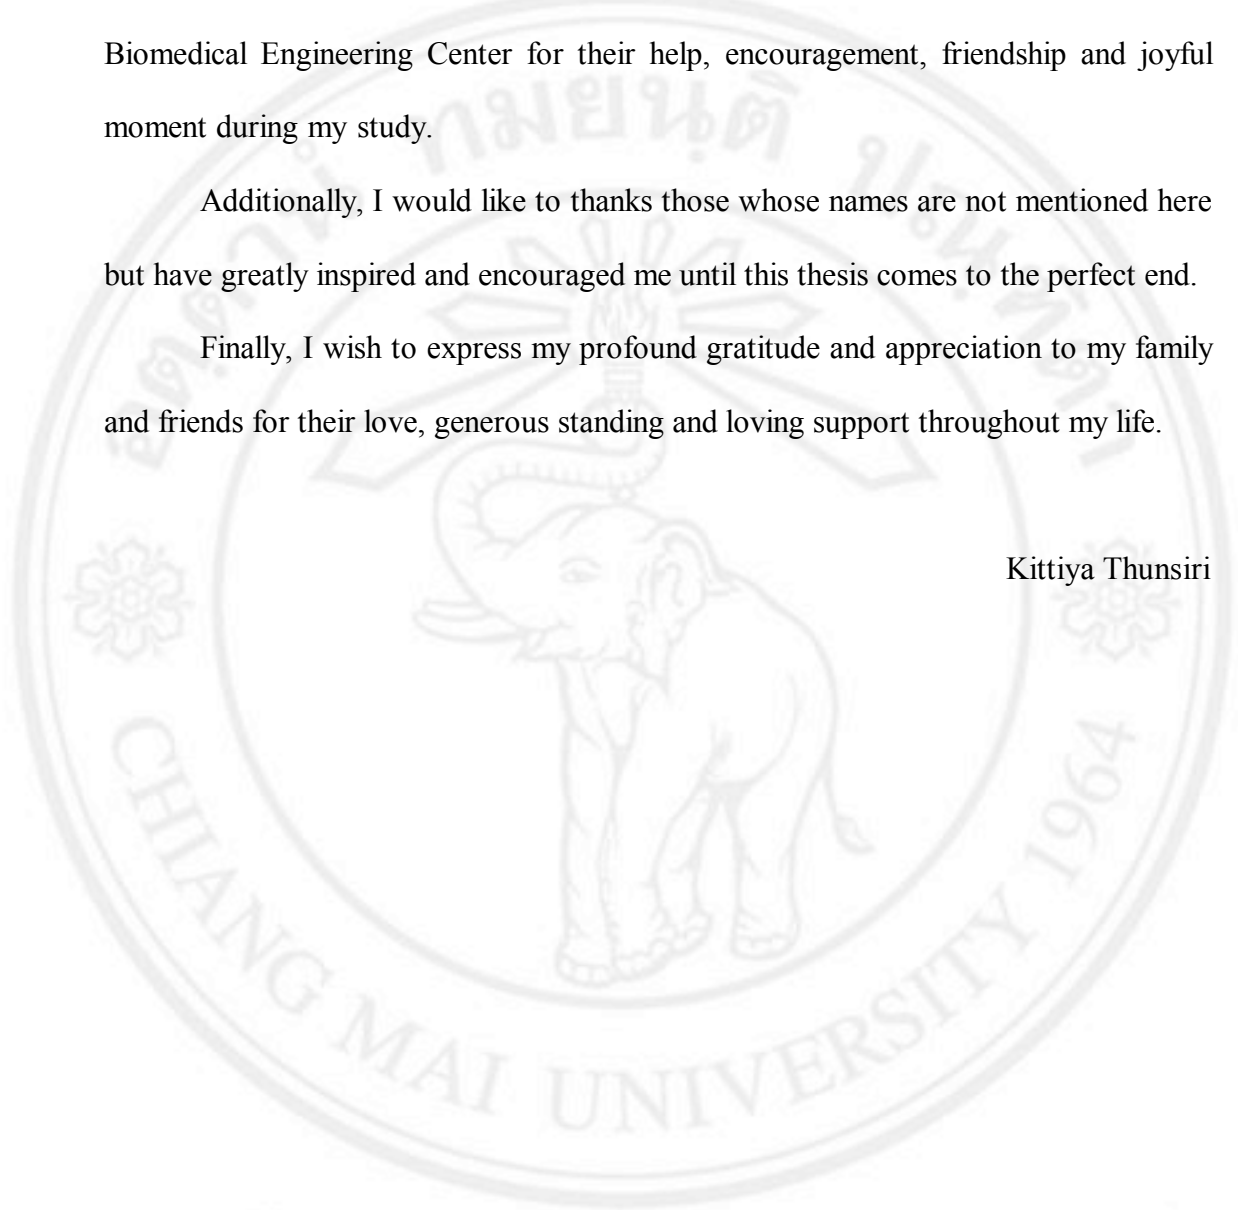

I would like to extend my sincere thanks to all the instructors in my whole life for providing me basic and advanced knowledge. Unforgettably, special thank to my

friends and staffs at Cardiac Electrophysiology Research and Training Center and at Biomedical Engineering Center for their help, encouragement, friendship and joyful moment during my study.

Additionally, I would like to thanks those whose names are not mentioned here but have greatly inspired and encouraged me until this thesis comes to the perfect end.

Finally, I wish to express my profound gratitude and appreciation to my family and friends for their love, generous standing and loving support throughout my life.

Kittiya Thunsiri
