## ACKNOWLEDGEMENT

I would like to express my deepest appreciation and gratitude to everyone who gave me the possibility to complete this thesis. I am deeply indebted to Asst. Prof. Dr. Chichol Phalaraksh, Chairperson of the Advisory committee for my thesis work, for his exemplary guidance on the research plan, monitoring and constant encouragement throughout my graduation study and this thesis.

I am grateful for the kindness of Prof. Dr. Munetsugu Kawashima that always has for me. This thesis would not have been possible without his support of good material for my experiment, guidance for heavy metal experiment and a thorough review. Another co-advisor I deeply want to thanks is Asst. Prof. Dr. Somporn Chantara for all of her support, guidance, comments and thesis writing helped. Moreover I would also like to thank my thesis committee. This thesis would have never been accomplished without their contribution.

I gratefully thank the Mae Sot Clean Energy Company, Mae Sot District, Tak Province for field information and facilities. Besides, I gratefully thank the Department of Environmental Quality Promotion (DEQP) Ministry of Natural Resource and Environment and the Development and Promotion for science and technology talent project (DPST) for financial support.

My special are extended to the friends in FBRL, ECRL Laboratory and Miss Roongruang Janta for their kindly assistance and helpfulness, Thanks are also given to Science Environment, Faculty of Science, Chiang Mai University for instrument support along this study.

Finally, a sincere thanks to my parents and my close friends for the great encouragement, inspiration, patience, understanding and all supports throughout my degree.

Nattawut Sareein
