*This thesis is dedicated to my loving parents, whose words
of encouragement and push for tenacity ring in my ears.*

And to all others who have given me kindly help,

I respectfully dedicate my thesis.

ACKNOWLEDGEMENTS

First of all, I would like to take this opportunity to express my deep gratefulness to my dissertation advisor, Assc. Prof. Dr. Chalobol Wongsawad for her invaluable guidance, tremendous patience, inspiration and caring throughout this study. I would like to express my profound gratitude to my co-advisors, Prof. Dr. Jong Yil Chai of the Department of Parasitology and Tropical Medicine, Seoul National University College of Medicine, Seoul, Korea and Assc. Prof. Dr. Somboon Anantalabhochai of the Department of Biology, Faculty of Science, Chiang Mai University for their helpful suggestions and comments. A special thanks to Asst. Prof. Dr. Kanokporn Saenphet, my committee chairman for her countless hours of reflecting, reading, encouraging, and most of all patience throughout the entire process. Thank you Dr. Amnat Rojanapaibul, Asst. Prof. Dr. Choosak Nithikathkul and Dr. Decha Thapanya for agreeing to serve on my committee.

My sincere thanks also to Dr. Rattapon Kraiklang of Department of Nutrition, Faculty of Public Health, Khon Kaen University, Dr. Suksan Chuboon, Program in Applied Biology, Faculty of Science, Buriram Rajabhat University and my colleagues in the Parasitology Research Laboratory, Department of Biology, Faculty of Science, Chiang Mai University for their suggestions, friendship and assistance.

Special thanks to Mr. Bong-Kwang Jung, Mr. Deok Gyu Kim, Miss Hyemi Lim, Miss Jaeun Cho, Miss Seoyun Choi and members of Department of Parasitology and Tropical medicine, Seoul National University College of Medicine for their care, help and suggestions during research at Seoul, Republic of Korea. Their excitement and willingness to provide feedback made the completion of this research an enjoyable experience. Thanks are also extended to Mr. Sung-Yil Choi, Electron Microscopy Unit, Department of Parasitology and Tropical Medicine, Institute of Endemic disease, Seoul National University College of Medicine, and Mrs. Bussabong Kantalue, Electron Microscopy Research and Service Center,

Faculty of Science, Chiang Mai University for their technical assistance electron microscopic operation and photography.

Thank you to all of my extended and my friends for the support and inspiration given to me to accomplish these challenging years of study. I would especially like to thank Dr. Surachai Techaoei and Mr. Isara Nettayarak, for revealing the spirit of true friendship.

I am grateful for Thailand Research Fund (TRF) for financial support through the Royal Golden Jubilee Ph.D. scholarship program (Grant No. PHD/0293/2550).

Finally, special thanks to my most beloved persons, my parents and sister for their constant support and inspiration.
