Chapter 1 Introduction	1
Introduction	1
Chapter 2 Literature review	4
1. General characteristic of Physic nut	5
2. Seed oil	7
3. Physic nut oil	11
4. Oil production in plants	13
5. Plant cell culture in Physic nut.	15
Chapter 3 Material and Methods	19
1. Plant Materials	19
2. Methods	19
Part 1 Studies on callus induction from endosperm explants of Physic nut (J.curcas L.)	19
Part 2 Study on growth and oil content from cell suspension culture of endospermcell of Physic nut (J.curcas L.)	20
Part 3 Study on oil production from endosperm cells of Physic Nut (J.curcas L.) in a modified bubble column bioreactor.	24

	page
Chapter 4 Results and Discussion	26
Part 1 Studies on callus induction from endosperm explants of Physic Nut(<i>J. curcas</i> L.)	26
Part 2 Study on growth and oil content from cell suspension culture of endosperm cell of Physic Nut (<i>J. curcas</i> L.)	29
Part 3 Study on oil production from endosperm cells of Physic Nut in a modified bubble column bioreactor.	61
Chapter 5 Conclusions	64
Part 1 Studies on callus induction from endosperm explants of Physic Nut (<i>J. curcas</i> L.)	64
Part 2 Study on growth and oil content from cell suspension culture of endosperm cell of Physic Nut (<i>J. curcas</i> L.)	64

LIST OF TABLES

		page
Table 1	The lipid class compositions (weight % of the total lipids) of various plant tissues.	9
Table 2	The fatty acid compositions (weight % of the total) of some seed oils.	9
Table 3	Selected properties of some common fatty acids and esters.	10
Table 4	Major fatty acids (in wt.-%) of some oils and fats used or tested as alternative diesel fuels.	11
Table 5	Show the properties of diesel, methanol, Physic nut oil and methyl ester of Physic nut oil.	12
Table 6	Auxin types and concentrations.	20
Table 7	Combinations of temperature levels and sucrose concentrations.	23
Table 8	Effects of auxin types and concentrations on callus formation From endosperm explants of <i>J. curcas</i> L.	29
Table 9	Effect of temperature on fresh weight (g/30ml) of jatropa endosperm suspended cell during culturing for 20 days.	42
Table 10	Effect of sucrose concentration on fresh weight (g/30ml) of jatropa endosperm suspended cell during culturing for 20 days.	43
Table 11	Combinatory effect on temperature and sucrose concentration on fresh weight (g/30ml) of jatropa endosperm suspended cell during culturing for 20 days.	44
Table 12	Effect of temperature on dry weight (g/30ml) of jatropa endosperm suspended cell during culturing for 20 days.	45
Table 13	Effect of sucrose concentration on dry weight (g/30ml) of jatropa endosperm suspended cell during culturing for 20 days.	46
Table 14	Combinatory effect on temperature and sucrose concentration on dry weight (g/30ml) of jatropa endosperm suspended cell during culturing for 20 days.	47

Table 15	Main effect of temperature on the ratio of fresh weight to dry weight (FW/DW) of jatropha endosperm suspended cell during culturing for 20 days.	48
Table 16	Main effect of sucrose concentration on the ratio of fresh weight to dry weight (FW/DW) of jatropha endosperm suspended cell during culturing for 20 days.	49
Table 17	Effects of temperature and sucrose concentration on the ratio of fresh weight to dry weight (FW/DW) of jatropha endosperm suspended cell during culturing for 20 days.	50
Table 18	Effect of temperature on the cell number of jatropha endosperm suspended cell during culturing for 20 days.	51
Table 19	Effect of sucrose concentration on the cell number of jatropha endosperm suspended cell during culturing for 20 days.	52
Table 20	Combinatory effect of temperature and sucrose concentration on the cell number of jatropha endosperm suspended cell during culturing for 20 days.	53
Table 21	Effect of temperature on packed cell volume (cm^3/cm^3) of jatropha endosperm suspended cell during culturing for 20 days.	54
Table 22	Effect of sucrose concentration on packed cell volume (cm^3/cm^3) of jatropha endosperm suspended cell during culturing for 20 days.	55
Table 23	Combinatory effect of temperature and sucrose concentration on packed cell volume (cm^3/cm^3) of jatropha endosperm suspended cell during culturing for 20 days.	56
Table 24	Effect of temperature on total lipid extract (TLE) (w/w) of jatropha endosperm suspended cell during culturing for 20 days.	57
Table 25	Main effect of sucrose concentration on total lipid extract (TLE) (w/w) of jatropha endosperm suspended cell during culturing for 20 days.	58

Table 26	Combinatory effect of temperature and sucrose concentration on total lipid extract(TLE) (w/w) of jatropha endosperm suspended cell during culturing for 20 days.	59

LIST OF ABBREVIATIONS

2,4-D	2,4-dichlorophenoxyacetic acid
ACCase	acetyl-CoA carboxylase
CRD	completely randomized design
DW	dry weight
FW	fresh weight
IBA	indole-3-butyric acid
JCL	<i>Jatropha curcas</i> Linnaeus
MS medium	Murashige and Skoog medium
NAA	1-naphthaleneacetic acid
PC	phosphatidyl choline
PCV	packed cell volume
PE	phosphatidyl ethanolamine
PEG	polyethylene glycol
PI	phosphatidyl inositol
TG	triglyceride
TAGs	triacylglycerol
%TLE	percentage of total lipid extract

LIST OF SYMBOLS

$^{\circ}\text{C}$	degree Celsius
μM	micro molar
g	gram
mg/L	milligram per litre
ppm	part per million
rpm	round per minute
