ACKNOWLEDGEMENT

I greatly thank Dr. Tanachai Pankasemsuk, Assoc. Prof. Dr. Pornchai Lueang-a-papong, Prof. Dr. Aranya Manosroi and Dr. Viboon Changrue for their useful suggestions, discussions and encouragement in conducting this research. I am also grateful to Assoc. Prof. Dr. Anupan Kongbangkerd for their comments to improve this dissertation.

I am thankful to Associate Professor Tawatchivaket for his kind permission which enabled me to use many laboratory apparatus and chemicals in Plant Tissue Culture Laboratory at the Faculty of Science and Technology, Chiang Rai Rajabhat University.

I thank the officers of Horticulture Department for their help.

I thank the Office of the Higher Education Commission, Ministry of Education, for supporting by grant fund under the program Strategic Scholarships Fellowships Frontier Research Network for the PhD Program Thai Doctoral degree for this research.

I am very grateful to my beloved father and mother, my wife and my son for their understanding, encouragement and help during many years of my study.

Kritsaphong Pasitvilaitham
