

APPENDIX A

OMTI for Electricity Supply Industry

Theme	Objective	Measurement	Target	Initiative
Financial				
F1 Public Debt	F1.1 government electricity loan	Investment ratio		
		No. of acceptance loan		
	F1.2 investor payback guarantee	Pay back level		1. Product trade-off
F2 Asset Utilization	F2.1 asset charging	Congestion rent		
	F2.2 return on asset/ overall equipment effectiveness	Asset capacity		

Theme	Objective	Measurement	Target	Initiative
Financial				
F3 Electricity Tariff	F3.1 maximizing profit	Electricity price		
		Output level		
	F3.2 financial withholding	Price cap		
	F3.3 quantity withholding	VOLL price		
		Marginal cost		
	F3.4 rate rebalancing	Contact relate with government policy		

Theme	Objective	Measurement	Target	Initiative
Financial				
F4 Investment	F4.1 PPA	Plant investment ratio		
		Technology investment ratio		
	F4.2 entry barrier	Installed capacity		
		Government support fund		
		Government support policy		

Theme	Objective	Measurement	Target	Initiative
Financial				
F5 National Resource Management	F5.1 foreign resource dependency	Resource dependency ratio		
		Foreign electricity purchase/ sale ratio		
		Fuel purchase contract		
	F5.2 native resource dependency	Resource dependency ratio		
		No. of support policy		
		Public petition		

Theme	Objective	Measurement	Target	Initiative
Customer				
C1 Government	C1.1 Social welfare	Level of service		
		Electricity price		
		Power pricing policy		
		Power usage policy		
	C1.2 Social satisfaction	Government turnover level		
		Government image		

Theme	Objective	Measurement	Target	Initiative
Customer				
C2 Industrial sector	C2.1 economic welfare	Government support policy		
	C2.2 promote buying power	Government support policy		
		Politic stability level		
		Impact on disaster		

Theme	Objective	Measurement	Target	Initiative
Customer				
C3 Investor	C3.1 investor retention	Investment support fund		
		Government support policy		
	C3.2 investor competition ability	Installed capacity level		
		Price cap level		

Theme	Objective	Measurement	Target	Initiative
Customer				
C4 Stakeholder	C4.1 company profit and debt	Public petition level		
		New technology investment		
		Company turnover		
	C4.2 stakeholder retention	Politic confidential		
		Disaster level		
		Stock price		

Theme	Objective	Measurement	Target	Initiative
Customer				
C5 general public	C5.1 social satisfaction	Voltage support		
		Energy fund for environmental impact		
		New technology usage		
		Government support law and policy		
		Political confidential level		
		Social petition		

Theme	Objective	Measurement	Target	Initiative
Internal Business Process				
I1 Asset management	I1.1 Asset capacity	Asset valuation level		
		Asset limitation level		
	I1.2 Asset monitoring	Demand to using asset		
		Asset capacity level		
		Asset charging ratio		

ALL RIGHTS RESERVED

Theme	Objective	Measurement	Target	Initiative
Internal Business Process				
I2 Power quality	I2.1 level of service	Outage duration time		
		SAIFI/SAIDI		
		Spinning reserve level		
		Fault generation		
		Switching error		
	I2.2 Transmission stability	Loss rate		
		FD/VD		
		SAIFI/SAIDI		
		Voltage sag		
		Voltage variation		

Theme	Objective	Measurement	Target	Initiative
Internal Business Process				
I3 Network Operation	I3.1 generator operation (SCADA)	Marginal generation cost		
		Price cap level		
		VOLL price		
		Market competition		
	I3.2 transmission operation (Smart Grid)	Physical transmission limited		
		Transmission congestion rent		
		System interruption ratio		
		System outage ratio		
		No. of contract for transmission congestion cost		

Theme	Objective	Measurement	Target	Initiative
Internal Business Process				
I4 Plant Scheduling and availability	I4.1 plant availability	Back start capacity		
		Load duration curve		
		Unit commitment		
		Overnight cost		
	I4.2 system capacity	Spinning reserve level		
		FD/VD ratio		
		Congestion rent ratio		

Theme	Objective	Measurement	Target	Initiative
Internal Business Process				
I5 Demand side management	I5.1 energy efficiency	No. of new plant		
		Energy bidding ratio		
		No. of long-term purchase contact		
	I5.2 optimizing energy resource	System brownout ratio		
		No. of long-term purchase contact		

All rights reserved

Theme	Objective	Measurement	Target	Initiative
Internal Business Process				
I6 Market regulation	I6.1 entry barrier	No. of support policy		
		Opportunity level		
	I6.2 pricing control	Price cap		
		No. of petition		
		No. of contract		
	I6.3 scope of authority	No. of petition from		
		No. Of license		
	I6.4 operation monitoring	Accuracy of information that send from licensor		
		Amount of missing information		

Theme	Objective	Measurement	Target	Initiative
Internal Business Process				
I7 Integrated resource planning	I7.1 reliability of supply	Amount of delivering cost of electricity service		
		Resource usage ratio		
	I7.2 country development plan	Local employment ratio		
		Level of power transparency		
		Level of environmental impact		

Theme	Objective	Measurement	Target	Initiative
Learning and Growth				
L1 law and bill	L1.1 law adjustment	No. of government policy		
		Amount of law for investor exception		
	L1.2 staff development	No. of staff training		
		Customer petition on billing service		

Theme	Objective	Measurement	Target	Initiative
Learning and Growth				
L2 standard	L2.1 standard development	No. Of case study from observation staff		
		Amount of training course		
		No. of training staff		
		No. Of new standard		
		Amount of customer satisfaction by using that standard		

2020-21

Theme	Objective	Measurement	Target	Initiative
Learning and Growth				
L3 Information Technology (IT)	L3.1 IT process development	Staff satisfaction ratio on IT development		
		Customer service time		
		customer satisfaction		
		Staff service time per one job		
	L3.2 Information transfer	Time of transferring information		
		Amount of information transfer in one time		

Theme	Objective	Measurement	Target	Initiative
Learning and Growth				
L4 Technology	L4.1 manufacturer motivation	No. of government support fund		
		Government support policy		
		No. of new technology that applied to the manufacturer		
	L4.2 staff development	No. of interest topic that present by staff		
		Amount of staff observation		
		No. of new technology that evaluate by staff		
	L4.3 public corporation	No. of new technology that applied to the public		

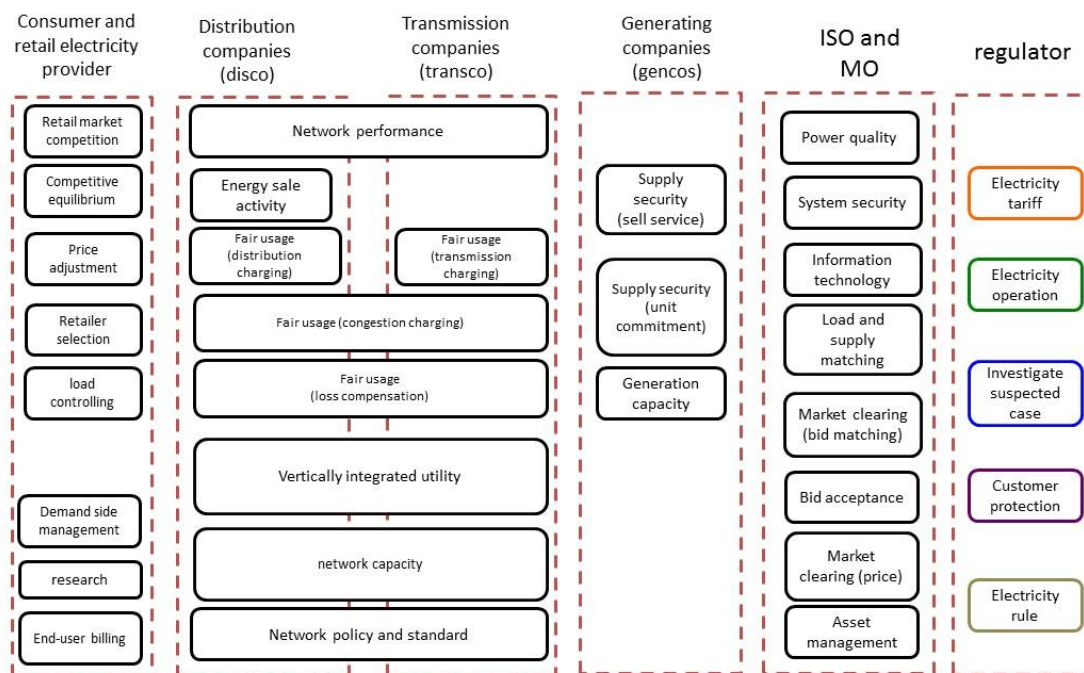

Theme	Objective	Measurement	Target	Initiative
Learning and Growth				
L5 Environmental impact	L5.1 public concentration	No. of public petition		
		Level of environmental impact per one generator/ transmission bus		
	L5.2 industry motivation	Clean energy support fund		
	L5.3 environmental standard	Amount of training cost for environmental standard		
		No. of environmental act		

Theme	Objective	Measurement	Target	Initiative
Learning and Growth				
L6 Educational institutes	L6.1 research motivation	No. of research topic that come from education institutes		
		No. of staff observation on each topic		
		Government research fund		
		No. of government support policy on each research topic		

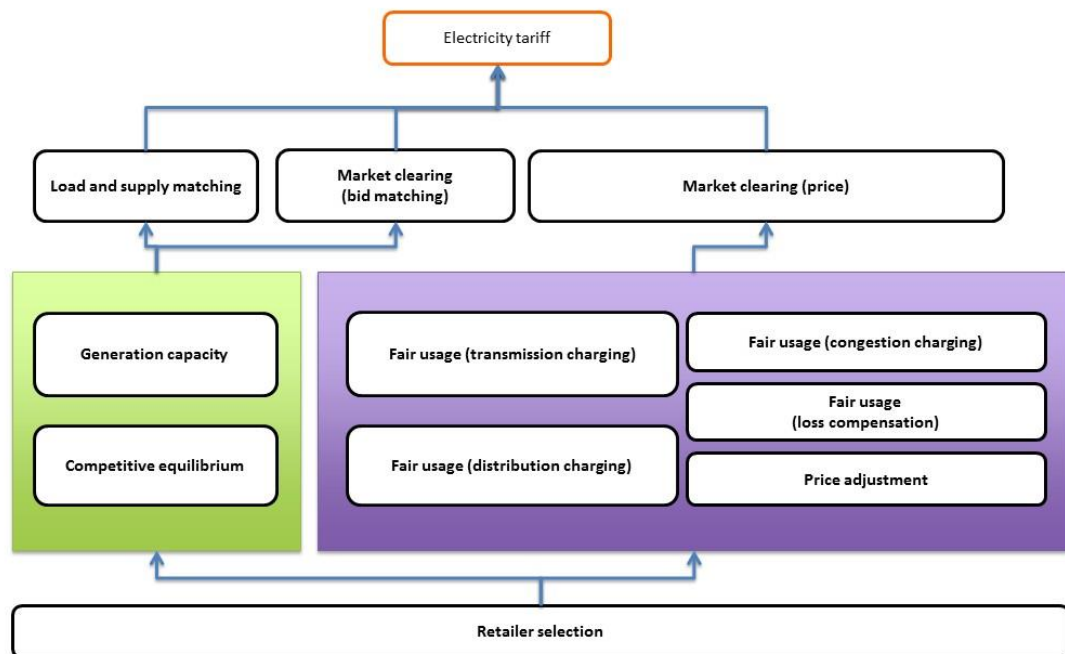

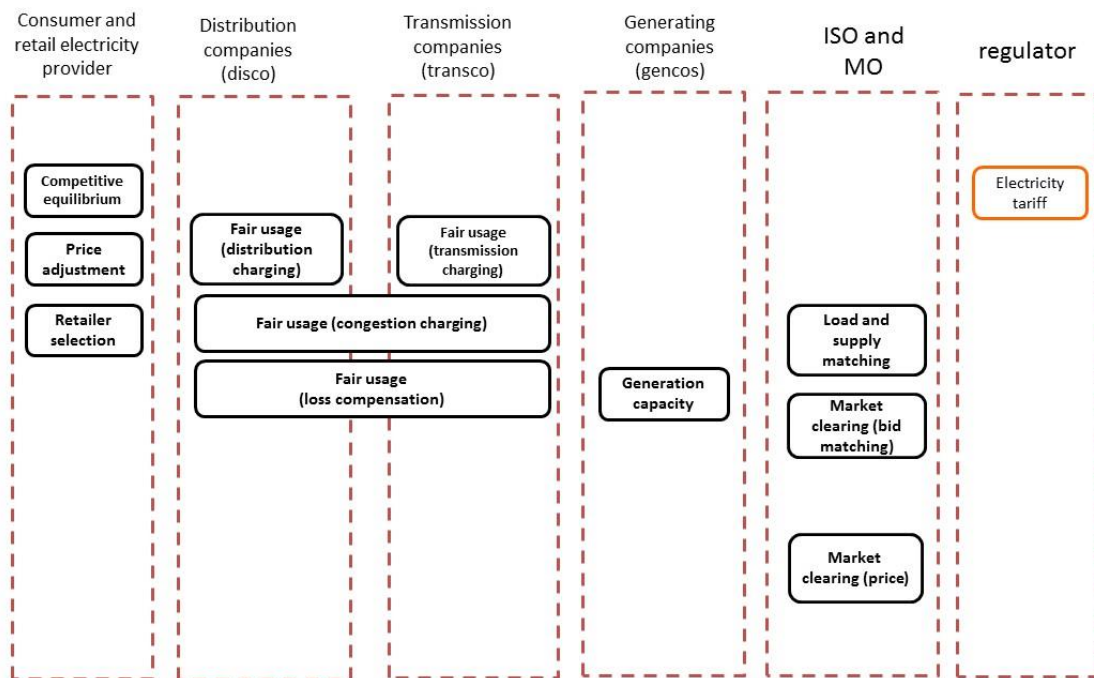

APPENDIX B

Task Template, Communication plan, CM 1 and CM 2 worksheet

Electricity tariff

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Generation capacity
Agent Involved	1. Sender (genco): plant info., fuel source, generation type, generation capacity, max capacity Receiver (MO): plant info., fuel source, generation type, generation capacity, max capacity
Information Items	MO request information from Genco 1. Role: fuel source, generation type, generation capacity act as a core object, while plant info. and max capacity are the support object 2. Form: - plant info. and generation type are data string - fuel source is data string and chart - generation capacity present in both data string and chart - max capacity present in the form of data string and chart 3. Medium: command line interface
Message Specification	
RECEIVE-MESSAGE	Type: REQUIRE Content: get information Reference: N/A From: genco To: MO
MORE-INFORMATION-MESSAGE	Type: REQUEST Content: request more information Reference: Committee order From: genco To: MO
Control over message	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Competitive equilibrium
Agent Involved	1. Sender (retail electricity provider): retailer info., competitive level Receiver (MO): retailer info., competitive level
Information Items	MO request information from retail electricity provider 1. Role: competitive level act as a core object, while retailer info. is the support object 2. Form: - competitive level present in both data string and chart - retailer info. present in the form of canned text and chart 3. Medium: command line interface
Message Specification	
PRESENT-MESSAGE	Type: REPORT Content: present previous operation result Reference: N/A From: retail electricity provider To: MO
RECEIVE-MESSAGE	Type: REQUIRE Content: get information Reference: N/A From: MO To: retail electricity provider
MORE-INFORMATION-MESSAGE	Type: REQUEST Content: request more information Reference: Committee order From: MO To: retail electricity provider
Control over message	

CM-1

communication model	transaction description worksheet CM-1
transaction identifier/name	Load and supply matching
information object	Information receive task : ① Competitive equilibrium ② Generation capacity ③ Price adjustment ④ Predicting loss compensation (fair usage)
Agents Involved	Generating company (gencos): send information to ISO Retail electricity provider: send information to regulator Distribution companies (disco): send information to regulator Transmission companies (transco): send information to regulator Independent system operator (ISO): receive information from gencos, retail electricity provider, disco and transco regulator: receive information from ISO
Communication Plan	Electricity Tariff
Constraints	
Information Exchange Specification	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Competitive equilibrium
Agent Involved	1. Sender (retail electricity provider): retailer info., competitive level Receiver (ISO): retailer info., competitive level
Information Items	ISO request information from retail electricity provider 1. Role: competitive level act as a core object, while retailer info. is the support object 2. Form: - competitive level present in both data string and chart - retailer info, present in the form of canned text and chart 3. Medium : command line interface
Message Specification	
REPORT-SIMULATION-MESSAGE	Type : REPORT Content : competition level in specific area Reference : N/A From : retail electricity provider To : ISO
RECEIVE-MESSAGE	Type : REQUIRE Content : get information Reference : N/A From : ISO To : retail electricity provider
MORE-INFORMATION-MESSAGE	Type : REQUEST Content : request more information Reference : Committee order From : ISO To : retail electricity provider
Control over message	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Generation capacity
Agent Involved	1. Sender (genco): plant info., fuel source, generation type, generation capacity, max capacity Receiver (ISO): plant info., fuel source, generation type, generation capacity, max capacity
Information Items	ISO request information from Genco 1. Role: fuel source, generation type, generation capacity act as a core object, while plant info. and max capacity are the support object 2. Form: - plant info. and generation type are data string - fuel source is data string and chart - generation capacity present in both data string and chart - max capacity present in the form of data string and chart 3. Medium : command line interface
Message Specification	
RECEIVE-MESSAGE	Type : REQUIRE Content : get information Reference : N/A From : genco To : ISO
MORE-INFORMATION-MESSAGE	Type : REQUEST Content : request more information Reference : Committee order From : genco To : ISO
Control over message	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Price adjustment
Agent Involved	1. Sender (retail electricity provider): electricity price, customer type, fair adjustment (Ft), load duration curve Receiver (ISO): electricity price, customer type, fair adjustment (Ft), load duration curve owner (ISO): PDP 2. Sender (genco): generation debt and generation capacity Receiver (ISO): generation debt and generation capacity
Information Items	ISO comply information from genco and retail electricity provider 1. Role: electricity price, customer type, fair adjustment (Ft), load duration curve act as a core object, while PDP, generation debt and generation capacity are the support object 2. Form: - customer type is data string - electricity price, fair adjustment (Ft), load duration curve, generation debt and generation capacity present in both data string and chart - PDP present in the form of data string, canned text and chart 3. Medium : command line interface
Message Specification	
REPORT-SIMULATION-MESSAGE	Type : REPORT Content : price simulation Reference : Ft formula From : retail electricity provider To : ISO
REPORT-FACTORS-MESSAGE	Type : REPORT Content : Ft simulation factors Reference : N/A From : retail electricity provider To : ISO
RECEIVE-MESSAGE	Type : REQUIRE Content : get information Reference : N/A From : retail electricity provider, genco To : ISO
MORE-INFORMATION-MESSAGE	Type : REQUEST Content : request more information Reference : Committee order From : ISO To : retail electricity provider, genco
Control over message	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Predicting loss compensation (fair usage)
Agent Involved	1. Sender (disco): loss rate, FD, VD, load duration curve, distribution info., line info. Receiver (ISO): loss rate, FD, VD, load duration curve, distribution info., line info. 2. Sender (transco): loss rate, FD, VD, load duration curve, distribution info., line info. Receiver (ISO): loss rate, FD, VD, load duration curve, distribution info., line info.
Information Items	ISO comply information from disco and transco 1. Role: loss rate act as a core object, while FD, VD, load duration curve, distribution info. and line info. is the support object 2. Form: - distribution info. and line info. are data string - loss rate, FD, VD and load duration curve present in both data string and chart 3. Medium : command line interface
Message Specification	
PRESENT-MESSAGE	Type : REPORT Content : present loss compensation information Reference : N/A From : disco, transco To : ISO
REPORT-FACTORS-MESSAGE	Type : REPORT Content : loss compensation factors Reference : N/A From : disco, transco To : ISO
REPORT-FACTORS-MESSAGE	Type : INFORM Content : loss prediction Reference : N/A From : ISO To : disco, transco
Control over message	

CM-1

communication model	transaction description worksheet CM-1
transaction identifier/name	Monitoring price (market clearing)
information object	Information receive task : ① Price adjustment ② Distribution charge ③ Transmission charge ④ congestion charge ⑤ Predicting loss compensation (fair usage)
Agents Involved	Retail electricity provider: send information to regulator Distribution companies (disco): send information to regulator Transmission companies (transco): send information to regulator MO: receive information from gencos and retail electricity provider
Communication Plan	Electricity Tariff
Constraints	
Information Exchange Specification	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Price adjustment
Agent Involved	<ol style="list-style-type: none"> Sender (retail electricity provider): electricity price, customer type, fair adjustment (Ft), load duration curve Receiver (MO): electricity price, customer type, fair adjustment (Ft), load duration curve owner (MO): PDP Sender (genco): generation debt and generation capacity Receiver (MO): generation debt and generation capacity
Information Items	<p>MO comply information from genco and retail electricity provider</p> <ol style="list-style-type: none"> Role: electricity price, customer type, fair adjustment (Ft), load duration curve act as a core object, while PDP, generation debt and generation capacity are the support object Form: - customer type is data string - electricity price, fair adjustment (Ft), load duration curve, generation debt and generation capacity present in both data string and chart - PDP present in the form of data string, canned text and chart Medium : command line interface
Message Specification	
RECEIVE-MESSAGE	<p>Type : REQUIRE Content : get information Reference : N/A From : retail electricity provider, genco To : MO</p>
MORE-INFORMATION-MESSAGE	<p>Type : REQUEST Content : request more information Reference : Committee order From : MO To : retail electricity provider, genco</p>

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Network performance
Agent Involved	1. Sender (disco): loss rate, line info., network duration ratio, network duration by case Receiver (ISO): loss rate, line info., network duration ratio, network duration by case 2. Sender (transco): loss rate, line info., network duration ratio, network duration by case Receiver (ISO): loss rate, line info., network duration ratio, network duration by case
Information Items	ISO comply information from disco and transco 1. Role: loss rate, network duration ratio, network duration by case act as a core object, while line info. is the support object 2. Form: - line info. is data string - loss rate, network duration ratio, network duration present in both data string and chart 3. Medium : command line interface
Message Specification	
RECEIVE-MESSAGE	Type : REQUIRE Content : get information Reference : N/A From : disco, transco To : ISO
REPORT-FACTORS-MESSAGE	Type : INFORM Content : network performance indicator Reference : N/A From : disco, transco To : ISO
REQUEST-MESSAGE	Type : REJECT-TD. Content : ask for new information Reference : N/A From : ISO To : disco, transco
Control over message	

CM-1

communication model	transaction description worksheet CM-1
transaction identifier/name	System security
information object	Information receive task : ① Supply security (unit commitment) ② Supply security (sell service) ③ Network performance
Agents Involved	Generating company (gencos): send information to ISO Distribution companies (disco): send information to ISO Transmission companies (transco): send information to ISO Independent system operator (ISO): send information to regulator regulator: receive information from ISO
Communication Plan	Electricity operation
Constraints	
Information Exchange Specification	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Supply security (unit commitment)
Agent Involved	1. Sender (genco): unit commitment, electricity production Receiver (ISO): generation capacity, max capacity, bidder info. 2. Sender (ISO): bidder info., PDP, generation technology, bidder info. Receiver (regulator): bidder info., PDP, generation technology, bidder info.
Information Items	ISO request information from genco 1. Role: unit commitment, electricity production act as a core object, while generation capacity, max capacity, bidder info. and PDP are the support object 2. Form: - bidder info. and PDP is data string - unit commitment, electricity production, generation capacity, max capacity present in both data string and chart 3. Medium : command line interface
Message Specification	
RECEIVE-MESSAGE	Type : REQUIRE Content : get information Reference : N/A From : genco To : ISO
MORE-INFORMATION-MESSAGE	Type : REQUEST Content : request more information Reference : Committee order From : regulator To : ISO, genco
REPORT-FACTORS-MESSAGE	Type : INFORM Content : unit commitment result Reference : N/A From : regulator To : ISO, genco
Control over message	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Supply security (sell service)
Agent Involved	1. Sender (genco): contact info. Wholesale electricity price, maintenance time Receiver (ISO): contact info. Wholesale electricity price, maintenance time
Information Items	ERC Staff comply information from EGAT, MEA and PEA 1. Role: previous information (Supply) and initial simulation act as a core object, while PDP is the support object 2. Form: - previous information is data string - initial simulation present in both data string and chart - PDP present in the form of data string, canned text and chart 3. Medium : command line interface
Message Specification	
RECEIVE-MESSAGE	Type : REQUIRE Content : get information Reference : N/A From : genco To : ISO
MORE-INFORMATION-MESSAGE	Type : REQUEST Content : request more information Reference : Committee order From : regulator To : ISO, genco
REPORT-FACTORS-MESSAGE	Type : INFORM Content : service level result Reference : N/A From : regulator To : ISO, genco
Control over message	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Network performance
Agent Involved	1. Sender (disco): loss rate, line info., network duration ratio, network duration by case Receiver (ISO): loss rate, line info., network duration ratio, network duration by case 2. Sender (transco): loss rate, line info., network duration ratio, network duration by case Receiver (ISO): loss rate, line info., network duration ratio, network duration by case
Information Items	ISO comply information from disco and transco 1. Role: loss rate, network duration ratio, network duration by case act as a core object, while line info. is the support object 2. Form: - line info. is data string - loss rate, network duration ratio, network duration present in both data string and chart 3. Medium : command line interface
Message Specification	
RECEIVE-MESSAGE	Type : REQUIRE Content : get information Reference : N/A From : disco, transco To : ISO
REPORT-FACTORS-MESSAGE	Type : INFORM Content : network performance indicator Reference : N/A From : disco, transco To : ISO
REQUEST-MESSAGE	Type : REJECT-TD. Content : ask for new information Reference : N/A From : ISO To : disco, transco
Control over message	

CM-1

communication model	transaction description worksheet CM-1
transaction identifier/name	Load and supply matching
Information object	Information receive task : ① Generation capacity ② Supply security (unit commitment) ③ Network performance
Agents Involved	Generating company (gencos): send information to ISO Distribution companies (disco): send information to ISO Transmission companies (transco): send information to ISO Independent system operator (ISO): send information to regulator regulator: receive information from ISO
Communication Plan	Electricity Operation
Constraints	
Information Exchange Specification	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Generation capacity
Agent Involved	1. Sender (genco): plant info., fuel source, generation type, generation capacity, max capacity Receiver (ISO): plant info., fuel source, generation type, generation capacity, max capacity
Information Items	ISO request information from Genco 1. Role: fuel source, generation type, generation capacity act as a core object, while plant info. and max capacity are the support object 2. Form: - plant info. and generation type are data string - fuel source is data string and chart - generation capacity present in both data string and chart - max capacity present in the form of data string and chart 3. Medium: command line interface
Message Specification	
RECEIVE-MESSAGE	Type: REQUIRE Content: get information Reference: N/A From: genco To: ISO
MORE-INFORMATION-MESSAGE	Type: REQUEST Content: request more information Reference: Committee order From: genco To: ISO
Control over message	

CM-2

communication model	Information Exchange Specification worksheet CM-2
Transaction	Supply security (unit commitment)
Agent Involved	1. Sender (genco): unit commitment, electricity production Receiver (ISO): generation capacity, max capacity, bidder info. 2. Sender (ISO): bidder info., PDP, generation technology, bidder info. Receiver (regulator): bidder info., PDP, generation technology, bidder info.
Information Items	ISO request information from genco 1. Role: unit commitment, electricity production act as a core object, while generation capacity, max capacity, bidder info. and PDP are the support object 2. Form: - bidder info. and PDP is data string - unit commitment, electricity production, generation capacity, max capacity present in both data string and chart 3. Medium: command line interface
Message Specification	
RECEIVE-MESSAGE	Type: REQUIRE Content: get information Reference: N/A From: genco To: ISO

CURRICULUM VITAE

Author's Name	Mr. Rattapol Rodprasert
Date/Year of Birth	11 October 1982
Place of Birth	Bangkok
Education	<p>2007-2008 Master's Degree in Information System, Faculty of Informatics, University of Wollongong, Wollongong, Australia.</p> <p>2002-2006 Bachelor's Degree in Business Administration, Major of Business Information System, Minor of Business Commerce, Assumption University, Bangkok, Thailand.</p>
Publications	<p>R. Rodprasert, T. Chandarasupsang, N. Chakpitak, "Developing Strategic National Energy Framework with Balance Scorecard (BSC)", 2012 SKIMA Conference, No. 73, 2012.</p> <p>R. Rodprasert, T. Chandarasupsang, N. Chakpitak and P.P. Yupapin, "3D Energy Framework Strategy by Balanced Scorecard", Life Science Journal, Vol. 11 No.2 15 Jan 2014, page 209-220.</p> <p>R. Rodprasert, T. Chandarasupsang, N. Chakpitak and P.P. Yupapin, "Alternative Design Approach for Energy Management System", Life Science Journal, Vol. 11 No.2 15 Jan 2014, page 221-234.</p>
Experience	<p>2006-2007 System Development and Project Auditor, CDG System Co. LTD., Bangkok, Thailand.</p> <p>2008-2012 Senior Information Technology Consultant, The Center for Strategic Management Co. LTD., Bangkok, Thailand.</p>

2010-2012 Co-Lecturer at Bangkok branch, College of Arts,
Media and Technology, Chiang Mai University,
Chiang Mai, Thailand.

2012- Present Information System Officer, Aeronautical Radio
of Thailand, Bangkok

Others

Computer literate: good knowledge of Microsoft office World,
Excel, Power Point, Visio and Access, good knowledge in
rational rose programs and ER-win for database management,
good knowledge in Windows Share Point, as well as in Photoshop
programs for photograph development.

Language literate: fluent knowledge in communicate skill for
reading, writing, listening and speaking in English skill, as well
as practical knowledge of Japanese
