## ACKNOWLEDGEMENT

Professional Military Education is one of the most important instruments in helping to develop experts in the military, apart from a basic training program. This is because learning development through individual difference can hardly be achieved just through basic training.

I would like to thank the *Senior Air Officer College, RTAF*, where my inspiration has been enlightened and which has driven my motivation to look for an alternative method of organization improvement. I would be very appreciative if the method I have developed could be of use in enhancing '*Professional Military Education*' and to individual difference knowledge workers in other workplaces. I would also like to thank the commanders and instructors for their support. Last but not least, this project would not have been completed without the participation of my students.

Furthermore, my special greatest gratitude goes to Dr.Tirapot Chandarasupasang, advisor and Asst.Prof.Dr. Nopasit Chakpitak, co-advisor for their visions, belief, will and their support that allowed me to extend the work, especially Dr.Tirapot, who always supports not only research, but also the inspiration for not giving up on all my work.

Finally it goes without saying, thank you to my family, particularly my husband, Mr.Somsak who always stays by my side as well as my children for their encouragement and belief in me.

Gp.Capt. Montatip Vonkdarunee
