ACKNOWLEDGEMENT

I would like to express my sincere gratitude and appreciation to my principal advisor, Dr. Orawan Verner for her valuable guidance, constructive criticism, encouragement and support from the initial to the final level which enabled me to accomplish this thesis.

I would like to express my great thank to my co-advisor, Prof. Dusit Lumlertgul for his valuable suggestions and helpful advice.

I would like to express a great thank to Chiang Mai Kidney Clinician's staffs for their assistance with data collection and all graduate students for their support and friendship.

I would like to thank all participants for their participation and also extend my special thankfulness to the Faculty of Associated Medical Sciences, Chiang Mai University for providing the funding to the project.

Finally, I would like to express my deep appreciation to my parents and my friends for their love, encouragement during difficult times and always being there for me.
