ACKNOWLEDGEMENTS

I am sincerely grateful to my advisor, Assoc. Prof. Dr. Soontorn Khamyong for his patience and kindness throughout my study, and trying his best to support me from the beginning to the end. Without his recommendation and guidance, my thesis would be not succeeded.

I would like to thank Asst. Dr. Jitti Pinthong, chairman of thesis examination, for his comments and correction of thesis manuscript. Special Thanks are to my thesis co-advisors for their comments on thesis works in soil science, Lect. Dr. Niwat Anongrak and Lect. Dr. Arawan Shutsrirung as well as Asst. Prof. Dr. Thaworn Onpraphai, a committee member of thesis examination. Their suggestions and corrections of my thesis manuscript are appreciated.

This research was conducted under the Doi Tung Development Project. The authors would like to thank MR. Disnada Diskul, the Mae Fha Loung Foundation's Secretary, the Director General of Department of National Park, Wildlife and Plants Conservation as well as the Royal Forest Department and all forestry officers for facilities during the field data collection.
