ACKNOWLEDGEMENT

I would like to express my sincere thanks to Dr. Suwicha Wannawichian for kindness, suggestions and opportunities to learn new things. I also would like to thank her for encouragement, including her lessons and many methodologies in life. Without all the support from her this thesis would not complete.

I would like to give a special thanks to Asst. Prof. Dr. Wichean Kriwattanawong for being a chairman of this thesis examination and all of committee members, Dr. Utane Sawangwit, Dr. Sujitra Ratjiranukool, and Dr. Suwicha Wannawichian, for suggestion.

I would like to thank staffs and teachers at department of physics and materials science, Faculty of Science, including all of astronomical research laboratory members at Chiang Mai University and all my friends to make my life special. Thanks all the experiences that came into my life which is inspired to study in astronomy.

This work based on observations by NASA/ESA Hubble Space Telescope obtained at the space Telescope Science Institute (STScI), which is operated by AURA inc. for NASA. This research was supported by National Astronomical Research Institute of Thailand (NARIT) and Graduate School Chiang Mai University.

Finally, I am very grateful for all the support and encouragement from my parents. Thanks for all the kindness and trust in me.
