### ACKNOWLEDGEMENTS

I would like to express my deepest appreciation to my advisor, Asst. Prof. Dr. Athipong Ngamjarurojana for giving me a once in a life time opportunity to work with him and his patience, guidance, supporting and understanding when many thing did not go as planned during the past four years in my lab time at Laser & Applied Optics Research Laboratory. This thesis would not have been possible without the support of the examining committees, Asst. Prof. Dr. Samran Lacharojana, Assoc. Prof. Dr. Chuleeporn Wongtawatnugool, Asst. Prof. Dr. Apichart Limpichaipanit, Dr. Komsanti Chokethawai, Dr. Khem Jirapatpimol. There is no doubt that these people deserve all the credit for any good things that this dissertation has produced, while I take full responsibility for any mistakes.

I would like to thank friends at Laser & Applied Optics Research Laboratory, and friends at the Department of Physics and Materials Science, Faculty of Science, Chiang Mai University, and friends at Division of Physics, Faculty of Science and Agricultural Technology, Rajamangala University of Technology Lanna, and freind at Au choix cafe & patisserie, friends at Uncle Thoa Phailom club, friends at Pa Ngae club who have played, helped, cheered and encouraged me to get to this point. Also, I would like to thank all helps and supports from office staff and technical staff of the Department of Physics and Materials Science, Faculty of Science, Chiang Mai University.

The authors are thankful to the Graduate School and the Faculty of Science, and Chiang Mai University and Rajamangala University of Technology Lanna (RMUTL), Chiang Mai, for the facility support.
