ACKNOWLEDGEMENT

I am using this opportunity to express my deepest appreciation to everyone who has supported me throughout this thesis creation. First of all, I am thankful to Asst. Prof. Dr. Hataichanoke Niamsup, my thesis advisor, for her kind advice, supervision, encouragement, very thoughtful guidance and great support throughout the course of this research. I am also sincerely grateful to my co-advisors, Prof. Dr. Sanchai Jaturasitha, Assoc. Prof. Dr. Nuansri Rakariyatham and Dr. Nuttee Suree, for their helpful suggestion, valuable comments and assistances for this thesis.

I also sincerely thank you to Dr. Nont Thitilertdecha and Dr. Nopakarn Chandet for being the examining committee of my thesis defense and for significant comments that greatly improved this thesis book.

Additionally, this thesis research was financially supported by the National Research Council of Thailand, the Graduate School of Chiang Mai University, and the Faculty of Science Publication Boosting Grant.

I thank Mr. Suriya Tateing for his assistance with the molecular docking analysis. In addition, I would like to thank to all staffs at the Department of Chemistry, Faculty of Science, Chiang Mai University for their help and service on the facilities. I am also grateful for all my lovely friends, who have always helped, supported, encouraged, cheered me up and gave me very thoughtful comments.

Finally, I express my special gratitude toward my family for their true love, encouragement and inspiration that helped me in the completion of this thesis.

Sadabpong Choonpicharn
