ACKNOWLEDGEMENT

The author would like to express her sincere gratitude and is greatly indebted to her thesis advisor, Assoc. Prof. Dr. Jaroon Jakmune, for his kind supervision, invaluable guidance, comments, suggestions and consistent motivation and constant encouragement throughout the study.

The author is truly grateful to Asst. Prof. Dr. Yuthsak Vaneesorn for his valuable comments, suggestions and discussion.

The author is sincerely grateful to Dr. Kritsana Jitmanee for his valuable comments, guidance, discussions, and the support of some equipments.

The author is grateful to Dr. Ponlayuth Sooksamiti (The Office of Primary Industry and Mine Region 3, Chiang Mai) for his support of water samples.

The author gratefully acknowledges the Center of Excellence for Innovation in Chemistry (PERCH-CIC) for granting the scholarship throughout her study. The Graduate School and Department of Chemistry is also acknowledged for partial support.

She would like to thank all members at Research Laboratory for Analytical Instrument and Electrochemistry Innovation (AIE Lab) for suggestions, assistance and cheering up, especially thank to Preeyaporn Reanpang, Thidarat Kruatian, Pattama Yanu and Pimporn Insain.

The author expresses her most gratitude and appreciation to her parents, Mr. Sanit and Mrs. Amporn Ngoenrueangrot for their everlasting love, care and encouragement. Finally, the author would like to thank those whose names are not listed here, who have one way or another contributed to the success of this work.

Suthisa Ngoenrueangrot
