ACKNOWLEDGEMENT

Firstly, I would like to express my appreciation to my advisor, Asst. Prof. Dr. Nawee Kungwan who has taught me everything since I attended a master's degree at Chiang Mai University for his kind encouragement, excellent guidance, and all supports. He also gives me the opportunities to study and work in many research topics. I sincerely thank Dr. Supawadee Namuangruk and Assoc. Prof. Dr. Jaroon Jakmunee for being my examination committee. I also thank my co-advisors, Asst. Prof. Dr. Burapat Inceesungvorn and Dr. Chanisorn Ngaojampa for their kind guidance and supports. Dr. Praput Thavornyutikarn and Computational Chemistry Laboratory (CCL) at Chiang Mai University are also acknowledged.

Secondly, I sincerely thank my research advisor in Japan, Prof. Dr. Stephan Irle, for a great opportunity to let me be a part of his group to do research. All members in his group at Nagoya University. Moreover, I would like to thank Prof. Dr. Mario Barbatti for his comments on manuscripts and an excellent NEWTON-X program.

Thirdly, I thank Research Professional Development Project under the Science Achievement Scholarship of Thailand (SAST), Faculty of Science, Chiang Mai University and Thailand's Office of the Higher Education Commission for financial supports. Graduate School of Chiang Mai University is also acknowledged.

Finally, I would like to thank Mr. Chanchai Sattayanon, Ms. Khanittha Kerdpol, Ms. Natthaporn Manojai, group members, teachers, friends and family for all supports. Without these people, my research could not be completed.
