Abstract in Thai	d
Abstract in English	f
List of Tables	k
List of Figures	m
Chapter 1 Introduction	1
1.1 The Rational Backgrounds	1
1.2 Background of the companies	11
1.3 Objectives of the study	12
1.4 Advantages in the study	12
1.5 Scope of the study	13
1.6 Data collection	13
1.7 Definition <sup>right</sup> by Chiang Mai University	13
Chapter 2 Theoretical Foundation and Literature Review	15
2.1 Financial market theory	15
2.2 Risk management theory	19
2.3 ASEAN Link	23
2.4 Econometrics	23
2.4.1 Unit Root Test	23

2.4.2 Augmented Dickry-Fuller test (ADF test)	24
2.4.3 Phillips-Perron test (PP test)	24
2.5 Bivariate Extreme Value distribution (BEVD)	26
2.5.1 Bivariate Generalized Extreme Value distribution (BGEV)	26
2.5.2 Bivariate Generalized Pareto Distribution (BGPD)	27
2.5.3 Parametric Bivariate Extreme Value Distribution Model	29
2.6 Literature Reviews	33
Chapter 3 Research Methodology	40
3.1 Calculation to return of the securities	40
3.2 Unit Root Test	42
3.2.1 Augmented Dickey-Fuller test (ADF test)	42
3.2.2 Phillips-Perron test (PP test)	43
3.3 Bivariate Extreme Value Analysis	44
3.3.1 Bivariate Generalized Extreme Value distribution (BGEV)	44
3.3.2 Bivariate Generalized Pareto Distribution (BGPD)	45
3.4 Conceptual Framework	54
Chapter 4 Empirical Results	56
4.1 The nature of stock market of SCC	57
4.2 The nature of stock market of SCCC	63
4.3 The nature of stock market of GAM	68
4.4 The nature of stock market of IJM	73
4.5 The nature of stock market of CES	78
4.6 The nature of stock market of LKH	83
4.7 Unit Root Test by ADF test and PP test	87
4.8 Bivariate Generalized Extreme Value distribution (BGEV)	90
4.8.1 Stock price index of SET and stock price of SCC	90
4.8.2 Stock price index of SET and stock price of SCCC	95

4.8.3 Stock price index of MYX and stock price of GAM	99
4.8.4 Stock price index of MYX and stock price of IJM	103
4.8.5 Stock price index of SGX and stock price of CES	107
4.8.6 Stock price index of SGX and stock price of LKH	111
4.9 Bivariate Generalized Pareto Distribution (BGPD)	115
4.9.1 Stock price index of SET and stock price of SCC	115
4.9.2 Stock price index of SET and stock price of SCCC	117
4.9.3 Stock price index of MYX and stock price of GAM	118
4.9.4 Stock price index of MYX and stock price of IJM	120
4.9.5 Stock price index of SGX and stock price of CES	122
4.9.6 Stock price index of SGX and stock price of LKH	123
Chapter 5 Conclusion	126
5.1 Conclusion	126
5.1.1 Conclusion of the nature of the construction industry's stock exchanges in ASEAN exchanges.	127
5.1.2 Conclusion of stationary test or Unit root test	127
5.2 Suggestions	129
References	130
Appendix	133
Appendix A	133
Appendix B	151
Curriculum Vitae	241

## LIST OF TABLES

	Page
Table 1.1 Import and export in ASEAN	4
Table 1.2 The growth rate of the world and the CLMV economy in year 2011-2013	6
Table 1.3 5 highest rank of construction industry's market capitalization in The Stock Exchange of Thailand.	9
Table 1.4 5 highest rank of construction industry's market capitalization in Bursa Malaysia.	9
Table 1.5 5 highest rank of construction industry's market capitalization in Singapore Exchange.	10
Table 4.1 Balance sheet from 2011 – 2014 of SCC	57
Table 4.2 Financial highlight of SCC	59
Table 4.3 Statistic highlight of SCC	60
Table 4.4 Balance sheet from 2011 – 2014 of SCCC	63
Table 4.5 Financial highlight of SCCC	65
Table 4.6 Statistic highlight of SCCC	66
Table 4.7 Balance sheet from 2011 – 2014 of GAM	68
Table 4.8 Financial highlight of GAM	70
Table 4.9 Statistic highlight of GAM	71
Table 4.10 Balance sheet from 2012 – 2015 of IJM	73
Table 4.11 Financial highlight of IJM	75
Table 4.12 Statistic highlight of IJM	76
Table 4.13 Balance sheet from 2011 – 2014 of CES	78
Table 4.14 Financial highlight of CES	80

Table 4.15 Statistic highlight of CES	81
Table 4.16 Balance sheet from 2012 – 2015 of LKH	83
Table 4.17 Financial highlight of LKH	85
Table 4.18 Statistic highlight of LKH	86
Table 4.19 The Unit root test of construction industry stock price and stock exchanges in ASEAN	88
Table 4.20 Bivariate Generalized Extreme Value Distribution (BGEV) between stock price index of SET and stock price of SCC	92
Table 4.21 Bivariate Generalized Extreme Value Distribution (BGEV) between stock price index of SET and stock price of SCCC	97
Table 4.22 Bivariate Generalized Extreme Value Distribution (BGEV) between stock price index of MYX and stock price of GAM	101
Table 4.23 Bivariate Generalized Extreme Value Distribution (BGEV) between stock price index of MYX and stock price of IJM	105
Table 4.24 Bivariate Generalized Extreme Value Distribution (BGEV) between stock price index of SGX and stock price of CES	109
Table 4.25 Bivariate Generalized Extreme Value Distribution (BGEV) between stock price index of SGX and stock price of LKH	113
Table 4.26 Bivariate Generalized Pareto Distribution (BGPD) between stock price index of SET and stock price of SCC	115
Table 4.27 Bivariate Generalized Pareto Distribution (BGPD) between stock price index of SET and stock price of SCCC	117
Table 4.28 Bivariate Generalized Pareto Distribution (BGPD) between stock price index of MYX and stock price of GAM	118
Table 4.29 Bivariate Generalized Pareto Distribution (BGPD) between stock price index of MYX and stock price of IJM	120
Table 4.30 Bivariate Generalized Pareto Distribution (BGPD) between stock price index of SGX and stock price of CES	122
Table 4.31 Bivariate Generalized Pareto Distribution (BGPD) between stock price index of SGX and stock price of LKH	123

## LIST OF FIGURES

	Page
Figure 1.1 ASEAN Community Members	2
Figure 1.2 ASEAN Exchange members	3
Figure 1.3 The Greater Mekong Subregion corridors	5
Figure 1.4 Number of securities that have market capitalization of more than 1 billion USD and average daily trading value of more than 10 million USD	8
Figure 2.1 Financial market structure	16
Figure 2.2 The age range of investors	18
Figure 2.3 Level of return on investment in securities	22
Figure 2.4 ASEAN Trading Link	23
Figure 3.1 Conceptual Framework	55
Figure 4.1 Bivariate relationship between stock price indices of SET and stock price of SCC by Bivariate Block Maxima Method	90
Figure 4.2 The relationship between daily closed price of SET and return stock price of SCC by Bivariate Block Maxima Method	91
Figure 4.3 Pickands value between stock price index SET and return stock price of SCC by Bivariate Block Maxima Method	91
Figure 4.4 Logistic distribution function between stock price index of SET and stock price of SCC by BGEV	93
Figure 4.5 Bivariate relationship between stock price indices of SET and stock price of SCCC by Bivariate Block Maxima Method	95

Figure 4.6 The relationship between daily closed price of SET and return stock price of SCCC by Bivariate Block Maxima Method	96
Figure 4.7 Pickands value between stock price index SET and return stock price of SCCC by Bivariate Block Maxima Method	96
Figure 4.8 Logistic distribution function between stock price index of SET and stock price of SCCC by BGEV	97
Figure 4.9 Bivariate relationship between stock price indices of MYX and stock price of GAM by Bivariate Block Maxima Method	99
Figure 4.10 The relationship between daily closed price of MYX and return stock price of GAM by Bivariate Block Maxima Method	100
Figure 4.11 Pickands value between stock price index MYX and return stock price of GAM by Bivariate Block Maxima Method	100
Figure 4.12 Logistic distribution function between stock price index of MYX and stock price of GAM by BGEV	101
Figure 4.13 Bivariate relationship between stock price indices of MYX and stock price of IJM by Bivariate Block Maxima Method	103
Figure 4.14 The relationship between daily closed price of MYX and return stock price of IJM by Bivariate Block Maxima Method	104
Figure 4.15 Pickands value between stock price index MYX and return stock price of IJM by Bivariate Block Maxima Method	104
Figure 4.16 Logistic distribution function between stock price index of MYX and stock price of IJM by BGEV	106
Figure 4.17 Bivariate relationship between stock price indices of SGX and stock price of CES by Bivariate Block Maxima Method	107
Figure 4.18 The relationship between daily closed price of SGX and return stock price of CES by Bivariate Block Maxima Method	108
Figure 4.19 Pickands value between stock price index SGX and return stock price of CES by Bivariate Block Maxima Method	108
Figure 4.20 Logistic distribution function between stock price index of SGX and stock price of CES by BGEV	110

Figure 4.21 Bivariate relationship between stock price indices of SGX and stock price of LKH by Bivariate Block Maxima Method	111
Figure 4.22 The relationship between daily closed price of SGX and return stock price of LKH by Bivariate Block Maxima Method	112
Figure 4.23 Pickands value between stock price index SGX and return stock price of LKH by Bivariate Block Maxima Method	112
Figure 4.24 Logistic distribution function between stock price index of SGX and stock price of LKH by BGEV	114
Figure 4.25 The Husler – Reiss' distribution function between stock price index of SET and stock price of SCC by BGPD	116
Figure 4.26 The Coles-Town's distribution function between stock price index of SET and stock price of SCCC by BGPD	118
Figure 4.27 The Husler – Reiss' distribution function between stock price index of MYX and stock price of GAM by BGPD	119
Figure 4.28 The Husler – Reiss' distribution function between stock price index of MYX and stock price of IJM by BGPD	121
Figure 4.29 The Coles-Town's distribution function between stock price index of SGX and stock price of CES by BGPD	123
Figure 4.30 The bilogistic distribution function between stock price index of SGX and stock price of LKH by BGPD	124
