ACKNOWLEDGEMENTS

First and foremost, I would like to very gratefully thank my supervisor Prof.Dr. Songsak Sriboonchitta for encouragement, supervision, unfailing support and his kind thought which has been my inspiration. I am also very grateful to him for inviting many famous and distinguished professors from around the world to teach his students. This thesis might not have done without him for helping in every stage.

I am very grateful to Prof.Dr. Hung T. Nguyen, who spends time to instruct me how to write research papers and how to be a good teacher, he also helps me to understand many concepts such as copulas, EVT, Bayesian statistics and game theory. I am grateful to Prof.Dr. Thierry Denoeux for his comments about belief functions in the first paper. I am also grateful to Prof.Dr. Amos Golan for the concept of entropy econometrics that was applied in the first paper. Also, I would like to thank my committee, Assoc. Prof. Dr. Kanchana Chokethaworn, Dr. Jirakom Sirisrisakulchai and Dr. Jianxu Liu for their comments in my thesis.

Special thanks are to my friends, Dr. Supanika Leurcharusmee, Dr. Kittawit Autchariyapanitkul, Mr.Somsak Chanaim for their friendship and support. I would like to thank my senior Dr. Chakorn Praprom for his suggestions when I study here and I also would like to thank many friends in our PhD room.

Additionally, I am very thankful to Prince of Songkla University (PSU) for providing me with the PhD Scholarship.

Lastly but not least important, I owe more than thanks to my family, for their support, encouragement and love. Without their support, I may not be successful.
