ACKNOWLEDGEMENTS

I would like to express my gratefulness to my major advisor Professor. Teraporn Vutyavanich for his patient guidance, enthusiastic encouragement, and useful critiques throughout the doctoral program. Besides, my great appreciation goes to my co-advisors, Associate Prof. Opas Sreshthaputra and Assist. Prof. Dr. Kawin Leelawat for their invaluable knowledge, insightful comments, and kindness. I would like to express my great appreciation to Prof. Dr. Jayanton Patumanond for his valuable and constructive suggestion in research methodology and statistical analysis along the way. Also many thanks go to Assist. Prof. Sakol Manusook and Associate Prof. Charintip Somprasit for their supports and insightful discussions about the researches. Special thanks to Dr. Dujrudee Chinwong and Assist. Prof. Dr. Apichart Tantraworasin for their invaluable assistances.

I would like to thank external examining committees, Associate Prof. Wirach Wisawasukmongchol and Associate Prof. Komsun Suwannarurk for their intellectual comments and suggestions to fulfill this work.

The studies in this thesis and publication fees were totally funded by Faculty of Medicine, Thammasat University University.

Permissions for reproduction were attained from The Editorial Office of Minimally Invasive Surgery from Hindawi Publishing Cooperation (study I), the Editorial Office of Journal of the Medical Association of Thailand (study II and study III).
