## ACKNOWLEDGEMENTS

I would like to express my most sincere gratitude and appreciation to Assoc. Prof. Arintaya Phrommintikul, my research advisor, for her valuable supervision, encouragement and support during my pursuit of the doctoral degree. This research would not have been completed without her guidance, dedication, and patience. I would like to thank my co-advisors Asst. Prof. Dr. Surarong Chinwong and Doctor Khanchai Siri wattana, MD, for all support, comments and suggestions on my dissertation. I greatly appreciate Prof. Dr. Jayanton Patumanond for his time, invaluable guidance on clinical epidemiology and statistical analysis of my study. I would also like to thank Assoc. Prof. Chamaiporn Tawichasri for her kindness and valuable suggestions.

I am very grateful to the external Examining Committee, Prof. Rungroj Krittayaphong, Assoc. Prof. Nattapong Kosachunhanun, and Assoc. Prof. Dr. Tanyong Pipanmekaporn, for their intellectual comments and suggestions to fulfil this work.

I wish to thank the Australian Government for awarding me an Endeavour Research Fellowship to undertake the fellowship under supervision of Assoc. Prof. John Joseph Hall at the University of Newcastle from July to December 2014. I would like to extend my appreciation to Assoc. Prof. John Joseph Hall for his valuable guidance in research and publications as well as his kindness while I was in Australia. My sincere gratitude also goes to colleagues and PhD students working at the Hunter Medical Research Institute, the University of Newcastle in Newcastle, and the Australian National University in Canberra whom I cannot mention all names for their support and friendship during my fellowship in Australia. My gratefulness also goes to the Pharmacy staff and the Faculty of Pharmacy, Chiang Mai University, for their support during my doctoral study. Special thank goes to my colleague, Dr. Penkarn Karnjanarat, who always gives me inspiration and support during my doctoral study and my professional career at the Faculty of Pharmacy.

Special thanks go to every 5<sup>th</sup> Ph.D. student and the senior Ph.D. students at the Clinical Epidemiology Unit, Chiang Mai University, for their friendship, assistance and encouragement.

I wish to thank the Editorial Office of the Therapeutic and Clinical Risk Management of Dove Medical Press (study I and II), and the BMC Cardiovascular Disorders of the BioMed Central (study III), for their permissions to reproduce the published papers included in this dissertation.

I wish to deeply thank the Faculty of Medicine, Chiang Mai University, for financial support parts of tuition fees, and the Graduate School, Chiang Mai University, for research funding of the three studies included in this dissertation.

There are many people who support me in various ways throughout my PhD journey that I cannot mention all names, but I still remember all their kindness and assistance. I deeply wish to thank all of them.

Lastly, my graduation would not be achieved without endless love and support of my parents Duangden Chaiyakhun and Kasorn Chaiyakhun, my husband Surarong Chinwong, and my family who always give me greatest love and willpower to complete my doctoral study.

Dujrudee Chinwong
