Abstract in Thai	v
Abstract in English	vi
Chapter 1 Introduction	1
1.1 The Background of Fixed Point Theory	1
1.2 Some Convergence Theorems for Fixed Point Iterative Methods Defined by Admissible Function	4
Chapter 2 Basic and Preliminaries	8
2.1 Metric Spaces, Convex Metric Spaces and Convex Prestructure	8
2.2 Banach Spaces and Useful Properties	10
2.3 Hilbert spaces and Useful Lemmas	18
Chapter 3 Admissible Functions and Convergence Theorems	21
3.1 Admissible Functions and Iterative Algorithms in Terms of Admissible Functions	21
3.2 Convergence Theorems for Fixed Point Iterative Methods Defined by Admissible Function	24
Chapter 4 Conclusion	40
Bibliography	43
Curriculum Vitae	46
