ACKNOWLEDGEMENT

Pursuing master degree is definitely one of the hardest and most stressful things in my life. Without the aids of many people, I wouldn't have come this far.

First and foremost I would like to express my deepest thank to my supervisor, Prof. Dr. Suthep Suantai, who supported me throughout my thesis with his patience and knowledge and great motivation when I'm in hardest times. I have been lucky to have a supervisor who cared so much about every progression of my work.

This work contains a number of improvement based on comments and suggestions provided by Prof. Dr. Suthep Suantai, Asst. Prof. Dr. Atid Kangtunyakarn and Asst. Prof. Dr. Warunun Inthakon. It is my pleasure to express my sincerest to them for their generous assistance.
