## ACKNOWLEDGEMENTS

I wish to express my deepest gratitude and appreciation to Asst. Prof. Dr. Kanda Whangchai, Asst. Prof. Dr. Jannong Uthaibutra and Asst. Prof. Dr. Somporn Chantara, my thesis advisor and co-advisors for their special efforts, unforgettable support, and excellent encouragement. The thesis advisory committees, who kindly accepted for my co-advisor and advised my proposal involving all topics of my dissertation. I exceedingly received worthy knowledge from this research and new knowledge for publishing in Journal. This thesis would not have been a complete success without their professional guidance.

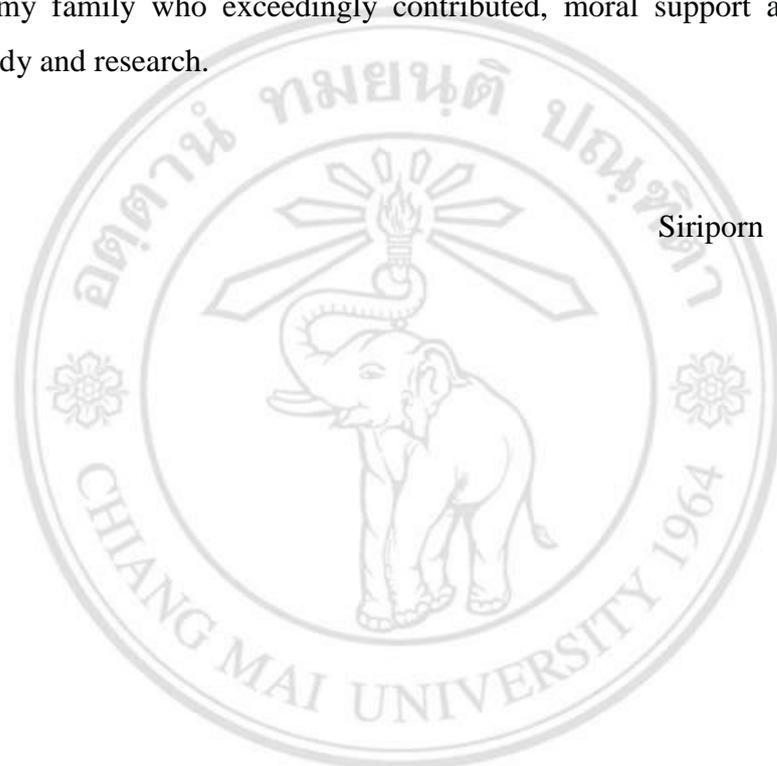

I am deeply indebted to Assoc. Prof. Dr. Nakao Nomura and all the wonderful staff members in the Laboratory of Life and Environmental Science at University of Tsukuba, Ibaraki, Japan. Additionally, I received several experiences for my living. I also had a great opportunity to study Japanese culture, it was excellent experience for my life during the study in Japan.

I would also like to express gratitude to Miss Gwen Anuevo and Mr. Redel Gutierrez for their kind advice in writing this thesis.

I am grateful to all the members of the all laboratories for their various contributions. (Postharvest Technology Research Institute, Departments of Biology and Chemistry, Faculty of Science, Chiang Mai University, Office of Agricultural Research and Development Region 1, Department of Agriculture, Graduate School of Life and Environmental Sciences, University of Tsukuba, Ibaraki, Japan)

The author acknowledges financial support from Agricultural Research and Development Agencies (ARDA) (the Scholarships for the Ph.D. program). This research was conducted in Postharvest Technology Innovation Center, Commission on Higher Education, Bangkok, Thailand, which provided the laboratory facilities.

Finally, I would like to express my gratulatory appreciation to my mother and the members in my family who exceedingly contributed, moral support and comforted during my study and research.

Siriporn Hassarangsee
