## ACKNOWLEDGEMENTS

It is with deep gratitude that the author express his sincere thanks to the following: Dr. Yaowaluk Chanbang for editing, reading and data analysis of this manuscript. This project would not have been possible without her generosity and encouragement. Professor Dr. Claus P. W. Zebitz for his consultation on this paper. Special thanks also to Dr. Wolfram Spreer for his support, guidance and for providing the greenhouse facilities. In addition, a big thank to Dr. Korawan Sringarm for making the central laboratory facilities available. For helping with maintenance, cleaning and the germination process, the author would like to thank the greenhouse staffs and students, especially Mr. Suchart Saehang, Ms. Pornsuda Panyanil, Ms. Kerstin, Ms. Wornwimol Wangspa and Ms. Chuleerat Rungson. Our SAIWAM coordinators, Dr. Nathitakarn Pinthukas and Mr. Ice for their help and support.

This study was funded as an interdisciplinary research project by the German Ministry for Education and Research (BMBF) for the project of improved production and processing of spice and medicinal plants in Northern Thailand. The author would also like to give special thanks for the support of DAAD scholarship, FVG Folien-Vertriebs GmbH (Dernbach, Germany), Yara (Bangkok, Thailand) and East-West Seed (Chiang Mai, Thailand). Special thanks to DAAD scholarship fund for the financial support during my studying in Germany and Thailand. Finally deepest thanks to my family for their kindness, generosity and patience for their many years of emotional and financial support. None of this would be possible without them.

Min Zaw Oo
