ACKNOWLEDGEMENTS

During a period of studying in master degree, many people providential assisted me. I would like to thank all of them for their supporting. I would like to express the deepest and sincere grateful to my thesis advisor, Asst. Prof. Dr. Patrinee Traisathit for their supervision, advice and guidance for me about statistical analysis, thesis writing and other suggestions of my graduate education. My sincere grateful also go to Assoc. Prof. Dr. Kaweesak Chittawatanarat, Asst. Prof. Dr. Sukon Prasitwattanaseree for their comments and suggestions about my thesis.

I gratefully thank Asst. Prof. Dr. Lily Ingsrisawang, Department of Statistics, Faculty of Science, Kasetsart University and Assoc. Prof. Dr. Jeerayut Chaijaruwanich, Faculty of Science, Chiang Mai University for having kindly accepted to be members of the thesis committee.

In addition, I am grateful to all of my friends especially Mr. Prakit Riyaten and Mr. Suttipong Kawilapat their abundant assistance in my projects. The project could not be success if I did not get bioelectrical impedance analyzer from the Maharaj Nakorn Chiang Mai Hospital, Faculty of Medicine, Chiang Mai.

Finally, I most gratefully acknowledge my parents and family for support and encouragement during my graduate study. I sincerely thank all of my teachers for the inspiration. This thesis is dedicated to all my beloved people.

Kanokkarn Juntaping
